the mysteries of christianity is matthias joseph scheeben s youthful magnum opus a logically rigorous and spiritually profound dogmatic theology in its pages he explores the intelligibility of christianity s supernatural mysteries and their deep connectedness ultimately demonstrating that christian theology constitutes a science before the court of human reason even as its object transcends human comprehension scheeben s task is to present a unified view of the whole panorama of revealed truth and he pursues this by considering nine key christian mysteries the trinity creation sin the incarnation the eucharist the church and its sacraments justification eschatological glory and predestination since the mystery of the trinity is the root of the supernatural order scheeben begins here showing that the foundation of the salvific economy lies in the eternal processions of persons in god the begetting of the son and the spiration of the spirit being in different ways the cause of the life of grace in the human soul when the son and the spirit are sent into the world in the

incarnation and through the bestowal of grace they provide the way for human beings to see god face to face in the beatific vision the end for which god created humans among the means of return to god scheeben particularly emphasizes the eucharist on account of its close connection with the mystery of the incarnation by placing his treatment of the eucharist before that of the church he signals that his is a genuinely eucharistic ecclesiology centered on the abiding presence of the incarnate divine son

a popular crime genre in the nineteenth century urban mysteries have largely been ignored ever since this historical and critical text examines the origins of the innovative genre which grappled with the rise of enormous anonymous cities beginning in france in 1842 then spreading rapidly across the continent and to america and australia writers covered include eugene sue george reynolds paul feval george lippard ned buntline and donald cameron

the ancient mysteries have long attracted the interest of scholars an interest that goes back at least to the time of the reformation after a period of interest around the turn of the twentieth century recent decades have seen an important study of walter burkert 1987 yet his thematic approach makes it hard to see how the actual initiation into the mysteries took place to do precisely that is the aim of this book it gives a thick description of the major mysteries not only of the famous eleusinian mysteries but also those located at the interface of greece and anatolia the mysteries of samothrace imbro and lemnos as well as those of the corybants it then proceeds to look at the orphic bacchic mysteries which have become increasingly better understood due to the many discoveries of new texts in the recent times having looked at classical greece we move on to the roman empire where we study not only the lesser mysteries which we know especially from pausanias but also the new ones of isis and mithras we conclude our book with a discussion of the possible influence of the mysteries on emerging christianity its detailed references and up to date bibliography will make this book indispensable for any scholar interested in the mysteries and ancient religion but also for those scholars who work on initiation or esoteric rituals which were often inspired by the ancient mysteries
