a compelling history of the contradictory often militaristic role of zen buddhism this book meticulously documents the close and previously unknown support of a supposedly peaceful religion for japanese militarism throughout world war ii drawing on the writings and speeches of leading zen masters and scholars brian victoria shows that zen served as a powerful foundation for the fanatical and suicidal spirit displayed by the imperial japanese military at the same time the author recounts the dramatic and tragic stories of the handful of buddhist organizations and individuals that dared to oppose japan s march to war he follows this history up through recent apologies by several zen sects for their support of the war and the way support for militarism was transformed into corporate zen in postwar japan the second edition includes a substantive new chapter on the roots of zen militarism and an epilogue that explores the potentially volatile mix of religion and war with the increasing interest in buddhism in the west this book is as timely as it is certain to be controversial

following the critically acclaimed zen at war 1997 brian victoria explores the intimate

relationship between japanese institutional buddhism and militarism during the second world war victoria reveals for the first time through examination of the wartime writings of the japanese military itself that the zen school s view of life and death was deliberately incorporated into the military s programme of spiritual education in order to develop a fanatical military spirit in both soldiers and civilians furthermore that d t suzuki the most famous exponent of zen in the west is shown to have been a wartime proponent of this zen inspired viewpoint which enabled japanese soldiers to leave for the battlefield already resigned to death victoria takes us onto the naval battlefield in the company of warrior monk and rinzai zen master nakajima genjō we view the war in china through the eyes of a buddhist military chaplain the book also examines the relationship to buddhism of japan s seven class a war criminals who were hung by the tokyo war crimes tribunal in 1948 a highly controversial study this book will be of interest first and foremost to students of zen as well as all those studying the history of this period not to mention anyone concerned with the perennial question of the proper relationship between religion and the state

in a challenge to romanticized visions of zen a western zen priest exposes the seamy underside of buddhism as a state religion in japan between the meiji restoration and the end of world war ii included are quotations by well known exponents of zen including the young d t suzuki glorifying emperor worship and imperial conquest annotation copyrighted by book news inc portland or

asia after versailles addresses an important but neglected watershed for asian nations the response to the paris peace conference of 1919 the conference marked the end of a conflict which although intrinsically european had globalized the world on many levels politically as well as economically culturally and socially it also stood at the beginning of a new order that saw the power centre shift towards the us and asia asian countries and people played a significant but so far largely neglected role in this momentous development bringing together an international range of experts in the history of china japan india and the ottoman empire turkey this pioneering volume demonstrates the importance of asia in the multifaceted global transformations that revolved around the paris peace conference and its aftermath traditional historical analysis focuses almost exclusively on us and european responses to the paris peace conference and the interwar order and often fails to take into account non western particularly asian voices this is the first book to demonstrate the far reaching asian dimensions of the impact of versailles in an unprecedented way making this an invaluable and interdisciplinary resource for academics and researchers in the fields of politics international relations area studies and history

In the late 1980s and early 1990s the relative calm world of Japanese Buddhist scholarship was thrown into chaos with the publication of several works by Buddhist scholars Hakamaya Noriaki and Matsumoto Shiro dedicated to the promotion of something they called critical Buddhism Hihan Bukkyo in their quest to re-establish a true rational ethical and humanist form of East Asian Buddhism the critical Buddhists undertook a radical deconstruction of historical and contemporary East Asian Buddhism particularly Zen while their controversial work has received some attention in English language scholarship this is the first book length treatment of critical Buddhism as both a philosophical and religious movement where the lines between scholarship and practice blur providing a critical and constructive analysis of critical Buddhism particularly the epistemological categories of critica and topica this book examines contemporary theories of knowledge and ethics in order to situate critical Buddhism within modern Japanese and Buddhist thought as well as in relation to current trends in contemporary Western thought
