OSF's distributed computing environment DCE is a blend of technologies from worldwide industry leaders Hewlett Packard Digital Equipment Corporation Siemens and Transarc. It is a fully integrated set of services that supports the development, use and maintenance of distributed applications and enables applications to harness effectively the unused power found in many networks. With OSF DCE users can obtain the maximum value from their installed networks while providing operating system and network independence and an architecture designed to incorporate new technologies as they become available.

Bring discipline and power to all your C/S projects. Roger Fournier's *A Methodology for Client Server and Application Development* shows you how to impose needed discipline on even the most complex and client server development projects. Fournier's start to finish methodology walks you step by step through every phase: survey, analysis, design, construction, implementation and beyond. Master powerful techniques for delivering finished software faster, including iterative, incremental development, prototyping, timeboxing and joint facilitated user sessions. With extensive examples, checklists and worksheets, Fournier demonstrates how to build an enterprise architecture with true scalability and flexibility, leverage object oriented programming techniques to the fullest, establish an effective testing process, promote reusability with DCOM, ActiveX™, CORBA and JavaBeans™ components, implement technology infrastructures that support and C/S development, discover specific ways to mitigate the risks that lead so many and client server projects to fail, learn how to improve communication with users, design databases and database access more effectively, plan for user training and data conversion and much more. There are no silver bullets, but this book's systematic best practices approach, tips and techniques will help you take charge of your and client server development and deliver

business results faster than ever before
