the river's gift tilly learns that being nice makes life the most fun as she takes care of a thirsty bird's summary in the river's gift a beautiful story readers meet tilly a lively and curious young girl who sees a thirsty bird in her backyard and goes on an unexpected trip of empathy and self discovery the story does a great job of teaching lessons about the value of being kind persistent and appreciating the beauty around us through tilly's adventures tilly's journey through the book is driven by her finding the thirsty bird at the beginning even though her path isn't easy she is motivated to get water because she knows what the bird needs her journey takes her through the garden over organic barriers and to listen to the river and an old tree for wisdom it is also emotional and spiritual showing her how important it is to connect with others and understand their feelings tilly reads each part of the river's gift because she wants to know how big of an effect small acts of kindness can have from the moment she sees that the bird's water bowl is empty until it sings its thanks tilly changes and learns she faces many problems along the way but she keeps going because she is determined and has learned to value nature's wisdom the wise old tree and the river teach tilly and her readers about the flow of kindness and how it can keep lives going and make them better when tilly gives the bird water to quench its thirst at the end of the story it represents the satisfaction of a deeper emotional need as well as the desire to give and receive kindness just as the bird's sweet thank you song fills the air tilly realizes that the real gifts are the happiness and understanding she gets from being kind not the water itself the story the river's gift is beautifully written and has a strong message about how important it is to be kind even though the plot is simple giving things away instead of keeping them can make you happy and small acts of kindness can make a big difference in the world young readers can learn from tilly's story that helping others can bring a lot of happiness this makes the river's gift a timeless story of kindness and generosity chapter 1 how tilly was found tilly was a little girl whose heart was as big as her mind she lived in a sunny part of a backyard full of flowers of every color you can think of and the sounds of nature filled the air there was a scene that stopped tilly in her tracks as she walked around this small haven her eyes were wide with wonder at everything she saw hidden under a green plant was a small bird tilly had never seen this kind of bird before it was happy flying from tree to tree it didn't have bright shiny feathers instead they were frayed and dirty it also didn't make much noise not even a happy song its voice was so soft that if you weren't paying close attention you might have missed it because tilly was interested and cared about it she got down next to the bird and stared at it softly its small chest heaved hard and she saw that its beak got longer like it was looking for something tilly knew right away that the bird needed water more than anything else she was so

determined that it made her heart grow she was aware of what she had to do that wasn't the only reason she wanted to help she thought it was her duty to make sure this young bird that had gotten into her garden got the care it needed when tilly found out this it was the start of an unbelievable trip she made up her mind right away to go look for some water for the thirsty bird tilly's garden which was a place of fun and discovery was the starting point for a wonderful trip no longer was it enough to just play and make up stories the goal was to make a difference in the world no matter how small tilly learned that small things could mean a lot to someone else in this case it was a little bird that was thirsty and needed help tilly worked on the project with as much drive as the sky is blue she made herself into a hero in one of her stories on a quest for something much more important than fame or money the chance to be nice and make the world a little better she had never been so happy and felt like she had a purpose in life as when she thought about helping the bird it looks like she found out a secret the best way to be happy is to give rather than receive tilly learned something new from what she found in her backyard that she thought she already knew she learned that we could find things to do and chances to do good right in our own neighborhoods all you need is a lot of heart and a little insight this bird with its dead feathers and weak voice was about to take tilly on an adventure she could never have imagined this trip will not only change the bird's life but it will also teach tilly how important it is to care about other people and how fun it is to help them thoughts of excitement and fear filled tilly's heart as she got ready to go find water she had no idea where the search would lead her or what problems she would have to deal with she was determined to get the bird's water back this quest began when the thirsty bird was found it was the start of an amazing and interesting adventure one where a little girl's heart showed the way and kindness won out this was the beginning of tilly's journey which showed her and everyone who heard her story how small acts of kindness can make a big difference in the world chapter 2 the empty space in the middle of her new mission to save the thirsty bird tilly noticed something simple but important that would change the course of her journey the bird's water bowl was empty still tilly saw this as more than just an empty plate she saw it as a small but important plea for help when she realized this she felt like she had more responsibilities to be kind she learned one must first pay attention and look beyond what people say to find the needs that are hidden in the world's quiet places tilly saw more than just the broken and dry bottom of the bowl when she looked inside she saw an image of what it meant to be human the dust that had built up there suggested that it had been missed rather than being deliberately ignored for tilly it was a wake up call that people who need help don't always know how to ask for it they suffer in silence hoping that someone will notice care and do something tilly's first lesson in kindness was taught in this empty bowl a small unimportant part of the backyard the lesson stressed how important it is to think about other people especially those whose words aren't loud enough to be heard this lesson wasn't just about putting water in a bowl it was about meeting a need and understanding that all living things have basic needs that must be met before we can be kind to them

tilly felt like she had a reason for living she saw that there were lots of chances to make the world a better place a world she thought she knew the empty bowl represented more than just thirst it also showed how much we need to care and act in a world that ignores even the smallest calls for help far too often the dry sandy area came to stand for tilly's goal truthfully being kind is more than just words and thoughts it made her remember that she learned that being kind isn't just an emotion but also a choice and a set of acts that come from having a strong sense of empathy and compassion she would use what she learned not only when she tried to help the bird but also whenever she talked to other people tilly learned that she needed to listen with her whole being watch with her eyes and really want to help the people around her in order to meet their needs it was a turning point for tilly when she stood in front of the empty water bowl now she was able to step outside of her own life and see herself through the eyes of someone else she felt connected to the bird like they both knew what was important even though they were different the empty bowl made her feel connected which pushed her forward it made her want to do more than just fill the bowl it made her want to connect with others in a more caring and understanding way

the special issue on advances in modeling and management of urban water networks uwns explores four important topics of research in the context of uwns asset management modeling of demand and hydraulics energy recovery and pipe burst identification and leakage reduction in the first topic the multi objective optimization of interventions on the network is presented to find trade off solutions between costs and efficiency in the second topic methodologies are presented to simulate and predict demand and to simulate network behavior in emergency scenarios in the third topic a methodology is presented for the multi objective optimization of pump as turbine pat installation sites in transmission mains in the fourth topic methodologies for pipe burst identification and leakage reduction are presented as for the urban drainage systems udss the two explored topics are asset management with a system upgrade to reduce flooding and modeling of flow and water quality with analyses on the transition from surface to pressurized flow impact of water use reduction on the operation of udss and sediment transport in pressurized pipes the special issue also includes one paper dealing with the hydraulic modeling of an urban river with a complex cross section

this work presents the state of the art of aquatic and semi aquatic ecological restoration projects in the netherlands starting from the conceptual basis of restoration ecology the successes and failures of hundreds of restoration projects are described numerous successful projects are mentioned in general ecological restoration endeavours greatly benefit from the progressive experience achieved in the course of the years failures mainly occur through insufficient application of physical chemical or ecological principles spontaneous colonization by plants and animals following habitat reconstruction is preferred however sometimes the re introduction of keystone species e.g. eelgrass salmon beaver is necessary in case the potential habitats are isolated or fragmented or if a seed bank is

lacking thus not allowing viable populations to develop re introducing traditional management techniques e g mowing without fertilization low intensity grazing is important to rehabilitate the semi natural and cultural landscapes that are so characteristic for the netherlands

as a rare testimony to the affected people the volume edited by cornelia kleinitz and claudia naser collects the work of ethnographers social geographers architects and archaeologists among local communities at the fourth cataract and in one case in a prospective resettlement area the contributions focus on traditional archite
