for anyone already practicing or turning to biodynamic gardening and farming methods numerous detailed questions arise such as how do you choose your seeds what fertilisers should you use which natural products are most effective this manual fully illustrated with explanatory diagrams and photographs provides the answers the book covers all aspects of making and using biodynamic preparations and composts managing the health of plants weed control parasite control issues around mixed cultivation animal care specialised crops and planting such as fruit trees and vines although the technical aspects of biodynamic growing are exhaustively covered the author also considers the human qualities necessary for this kind of agriculture to succeed this is an invaluable guide for all biodynamic growers to have to hand daily

are biodynamic wines any better than other wines are biodynamic methods much talked about but little understood scientific or not what s the difference between organic and biodynamic the popularity and availability of biodynamic wine has grown significantly in the last few years with more and more vineyards investing in biodynamic production if you ve ever wondered whether biodynamic wine is really worth it and what all the fuss is about this book is for you in 35 clear and pertinent questions expert biodynamic wine producer antoine lepetit explains what s so special about biodynamic wine

since the turn of the millennium there has been a burgeoning interest in and literature of both landscape studies and food studies landscape describes places as relationships and processes landscapes create people s identities and guide their actions and their preferences while at the same time are shaped by the actions and forces of people food as currency medium and sustenance is a fundamental part of those landscape relationships this volume brings together over fifty contributors from around the world in forty profoundly interdisciplinary chapters chapter authors represent an astonishing range of disciplines from agronomy anthropology archaeology conservation countryside management cultural studies ecology ethics geography heritage studies landscape architecture landscape management and planning literature urban design and architecture both food studies and landscape studies defy comprehension from the perspective of a single discipline and thus such a range is both necessary and enriching the routledge handbook of landscape and food is intended as a first port of call for scholars and

researchers seeking to undertake new work at the many intersections of landscape and food each chapter provides an authoritative overview a broad range of pertinent readings and references and seeks to identify areas where new research is needed though these may also be identified in the many fertile areas in which subjects and chapters overlap within the book

it has long been observed by farmers gardeners and botanists alike that from time to time certain plants seem to affect certain other plants growing their near them both favourably and unfavourably by taking account of these relationships farmers and gardeners can improve the quality of food and flowers reduce losses from pests and disease drought and frost and enhance both satisfaction and pleasure in their work and financial profit years of experimentation by richard gregg and subsequently helen philbrick and others resulted in this unique reference book it offers a detailed and comprehensive a z of plants and how they affect each other and their surrounding environment including the soil insects and birds

an unlikely vineyard tells the evolutionary story of deirdre heekin s farm from overgrown fields to a fertile productive and beautiful landscape that melds with its natural environment is it possible to capture landscape in a bottle to express its terroir its essence of place geology geography climate and soil as well as the skill of the winegrower that s what heekin and her chef husband caleb barber set out to accomplish on their tiny eight acre hillside farm and vineyard in vermont but an unlikely vineyard involves much more it also presents through the example of their farming journey and winegrowing endeavors an impressive amount of information on how to think about almost every aspect of gardening from composting to trellising from cider and perry making to growing old garden roses keeping bees and raising livestock from pruning or not to dealing naturally with pests and diseases challenged by cold winters wet summers and other factors deirdre and caleb set about to grow not only a vineyard but an orchard of heirloom apples pears and plums as well as gardens filled with vegetables herbs roses and wildflowers destined for their own table and for the kitchen of their small restaurant they wanted to create or rediscover a sense of place and to grow food naturally using the philosophy and techniques gleaned from organic gardening permaculture and biodynamic farming accompanied throughout by lush photos this gentle narrative will appeal to anyone who loves food farms and living well

this wonderful little book covers everything you need to know about the types of plants known as weeds ehrenfried pfeiffer

discusses the different varieties of weeds how they grow and what they can tell us about soil health the process of combatting weeds is discussed in principle as well as in practice so that it can be applied to any situation first written in the 1950s this is still one of the best overviews of the subject available
