indo aryan is the term applied to that branch of the indo european languages which was brought into india by the aryaans and of which the oldest recorded form is to be found in the hymns of the rgveda from this there developed on the one hand a literary medium called sanskrit which has been the vehicle down almost to the present day of a vast literature and on the other hand a great range of spoken forms which used by hundreds of millions have emerged as the chief language excluding the dravidian of southern india of the whole of pakistan india nepal and ceylon sindhi lahnda or western panjabi nepali assamese bengali oriya bihari maithilli awadhi hindi and urdu rajasthani dialects gujarati marathi konkani sinhalese indo aryan languages with many archaic features the kafiri and dardic dialects are still spoken in the valleys of the hindukush on both sides of the afghan pakistan border while the gypsies of europe and asia like the doms of hunza still use forms of the indo aryan dialect they brought out of india in the far south sinhalese was carried from ceylon out into the indian ocean to the maldiv islands in this book originally planned to be a volume of the linguistic survey of india the author has tried to do for these languages in their development from sanskrit something of what meyer lubke in his romanisches etymologisches wörterbuch did for the romance languages and latin under some 15000 sanskrit head words are set out forms each has assumed both in middle indo aryan pali sanskrit etc and in the modern languages thus presenting a picture of linguistic development over some three millennia the words quoted in this way number about 140000 this volume compiled by lady turner contains indexes arranged language by language of all these words

the history and mechanisms of the convergence of ancient aryan and non aryan cultures has been a subject of continuing fascination in many fields of indology the contributions to aryan and non aryan in india are the fruit of a conference on that topic held in december 1976 at the university of michigan ann arbor under the auspices of the center for south and southeast asian studies the express object of the conference was to examine the latest findings from a variety of disciplines as they relate to the formation and integration of a unified indian culture from many disparate cultural and ethnic elements

the book offers a new perspective on the emergence and spread of indo aryan in north india based on the analysis of more than 200 indo aryan languages and dialects it proves that there was more than just one immigration of indo aryan speakers to north india this left clear marks on the modern indo aryan languages when the vedic speaking indo aryan arrived in northern india there were already speakers of other indo aryan dialects that were slightly more archaic than vedic traces of these somewhat more archaic dialects are mainly found in peripheral indo aryan languages between the himalayas and the hindu kush they are therefore called outer languages while the descendants of vedic and classical sanskrit e g pali and hindi are called inner languages outer and inner languages differ not only in terms of archaicity but they have also developed differently especially in phonology the book also addresses the question of the linguistic situation in north india before the arrival of the first indo aryan again it is these peripheral languages albeit along with many small tibeto burmese himalayan languages that have preserved the richest linguistic data showing that prehistoric north india was dominated by austro asiatic languages before the arrival of the indo aryan
