excerpt from first course in chemistry in justification of this last change the authors would call attention to the fact that a very large percentage of those who take one year of chemistry do not continue the subject it seems unreasonable that after a year of study the student should have no knowledge of the most important of the organic compounds for he will meet with them in everyday life far oftener than with the majority of the compounds of inorganic chemistry the other changes incorporated in this revision are those which are suggested by the development of the science in the past ten years about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
