ethical questions about the use of animals and humans in research remain among the most vexing within both the scientific community and society at large these often rancorous arguments have gone on however with little awareness of their historical antecedents experimentation on animals and particularly humans is often assumed to be a uniquely modern phenomenon but the ideas and attitudes that encourage the biological and medical sciences to experiment on living creatures date from the earliest expression of western thought here anita guerrini looks at the history of these practices from vivisection in ancient alexandria to present day battles over animal rights and medical research employing human subjects guerrini discusses key historical episodes including the discovery of blood circulation the development of smallpox and polio vaccines and recent aids research she also explores the rise of the antivivisection movement in victorian england the modern animal rights movement and current debates over gene therapy from publisher description

the boundaries between human and beast forged a rugged philosophical landscape across early modern england spectators gathered in london s bear garden to watch the callous and brutal baiting of animals a wave of new scientists performed vivisections on live animals to learn more about the human body in perceiving animals the british scholar erica fudge traces the dangers and problems of anthropocentrism in texts written from 1558 to 1649 meticulous examinations of scientific legal political literary and religious writings offer unique and fascinating depictions of human perceptions about the natural world views carried over from bestiaries medieval treatises on animals posited animals as nonsentient beings whose merits were measured solely by what provisions they afforded humans food medicine clothing travel labor scientific knowledge without consciences or faith animals were deemed far inferior to humans while writings from the period asserted an enormous biological superiority fudge contends actual human behavior and logic worked sometimes accidentally to close the alleged gap in the bear garden even a man of the lowest social rank had power over a tortured animal sinking him though below the beasts the beast fable itself fails to show a true understanding of animals as it merely attributes human characteristics to beasts in an attempt to teach humanist ideals scholars and writers continually turned to the animal world for reflection despite this scientists of the period used animals for empirical and medical knowledge recognizing biological and spiritual similarities but refusing to

renege human superiority including an insightful reexamination of ben jonson s volpone and fascinating looks at works by francis bacon edward coke and richard overton among others fudge probes issues of animal ownership and biological and spiritual superiority in early modern england that resonate with philosophical quandaries still relevant in contemporary society

throughout history and in all places animals have been an essential part of human culture they have been hunted and domesticated studied and mythologized feared and loved our complicated relationships with other animals have repeatedly found expression in art literature religion and science in 1995 the new school for social research sponsored a landmark conference to explore human animal interactions published as a special issue of the journal social research under the title in the company of animals this collection is now available for the first time in a book edition

european culture in the seventeenth and eighteenth centuries witnessed a radical redefinition of humanity and its place in the environment together with a new understanding of animals and their relation to humans in examining the dynamics of animal human relations as embodied in the literature art farming practices natural history religion and philosophy of this period leading experts explore the roots of much current thinking on interspecies morality and animal welfare the animal human relationship challenged not only disciplinary boundaries between poetry and science art and animal husbandry natural history and fiction but also the basic assumptions of human intellectual and cultural activity expression and self perception this is specifically apparent in the re evaluation of sentiment and sensibility which constitutes a major theme of this chronologically organised volume authors engage with contemporary reactions to the commodification of animals during the period of british imperialism tracing how eighteenth century ecological consciousness and notions of animal identity and welfare emerged from earlier traditional models of the cosmos and reassessing late eighteenth century poetic representations of the sentimental encounter with the animal other they show how human experience was no longer viewed as an iterative process but as one continually shaped by the other in concluding chapters authors highlight the political resonances of the animal human relationship as it was used both to represent and to redress the injustices between humans as well as between humans and animals through a multifaceted study of eighteenth century european culture authors reveal how the animal presence both real and imagined forces a different reading not only of texts but also of society

relationships between humans and non human animals are deeply complex and often governed by tensions and paradoxes both wild and domestic metaphorical and real assistants and adversaries animals effortlessly bridge cultural and natural spaces and form an integral part of human lives this volume addresses several currently debated topics in science and culture how shall we rethink rebuild and re envision our relationships with other animals how do we construct ideas of the animal how can we negotiate animal interests against our own in which ways do we make sense and use of animals in human cultural spaces addressing the non human animal from the standpoint of various social and cultural constructions from a global and multidisciplinary perspective the chapters within this volume do not seek to answer these questions but rather to draw attention to the complexity of the underlying issues and the manifold dimensions of the animal human bond

animals and human society provides a solid scientific research based background to advance understanding of how animals impact humans animals have had profound effects on people from the earliest times ranging from zoonotic diseases to the global impact of livestock poultry and fish production to the influences of human associated animals on the environment on extinctions air and water pollution greenhouse gases etc to the importance of animals in human evolution and hunter gatherer communities as a resource for both science and non science animals and human society can be used as a text for courses in animals and human society or animal science or as supplemental material for introduction to animal science it offers foundational background to those who may have little background in animal agriculture and have focused interest on companion animals and horses the work introduces livestock production including poultry and aquaculture but also includes coverage of companion and lab animals in addition animal behavior and animal perception are covered animals and human society is likewise an excellent resource for researchers academics or students newly entering a related field or coming from another discipline and needing foundational information as well as interested laypersons looking to augment their knowledge on the many impacts of animals in human society features research based and pedagogically sound content with learning goals and textboxes to provide key information challenges readers to consider issues based on facts rather than polemics poses ethical questions and raises overall societal impacts balances traditional animal science with companion animals animal biology zoonotic diseases animal products environmental impacts and all aspects of human animal interaction

packed with fun incredible and often downright disgusting facts about the animal world this is a book that will both entertain and educate with questions like what if people behaved like animals what if you had pop up claws what if you could taste with your feet and what if your mum puked in your mouth full of awesome illustrations this book shows kids the hilarious consequences of animal behaviour in the human world

domestic animals are an integral component of human leisure experience and can enhance the physical social and mental wellbeing of humans the interplay of human and animal experiences of justice wellbeing rights and roles within leisure is the central theme of this book research explores the position of domesticated animals in human leisure experiences in a wide array of leisure settings chapters question whether domestic animals may have a desire for leisure that is different from human leisure whether animals have and wish to fulfil needs for meaningful leisure or non leisure and whether human leisure needs and desires may coincide or contradict wellbeing interests of animals this book provides a venue for the dissemination and exploration of research which champions the welfare and rights of these animals to have their needs and interests in leisure recognised it moves the debate about animals in leisure beyond the current limits which have seen research mainly confined to the exotic other rather than more mundane everyday domestic animals this book will be of interest to individuals in the fields of tourism ethics zoology animal behaviour and leisure studies

our relationship with animals is complex and contradictory we hunt kill and eat them yet we also love respect and protect them this ambivalent relationship is further complicated by the fact that we attribute human emotions and intelligence to animals we even go as far as likening them to children and treating them as family members drawing on a diverse range of case studies animals in person attempts to unravel our close and fascinating link with the animal kingdom this book

highlights the theme of cross species intimacy in contexts such as livestock care pet keeping and the use of animals in tourism the studies draw on data from different parts of the world including new guinea nepal india japan greece britain the netherlands and australia animals in person documents the existence of relations between humans and animals that in many respects recall relations among humans themselves

human animal co existence is central to a politics of life how we order societies and to debates about who we humans think we are in other words our ways of understanding and ordering human animal relations have economic and political implications and affect peoples everyday lives by bringing together historically oriented approaches and contemporary ethnographies which engage with science and technology studies sts this book reflects the multi sited multi species multi logic and multiple ways in which lives are and have been assembled disassembled practised and possibly policed and politicized instead of asking only how control and knowledge are and have been extended over life the chapters in this book also look at what happens when control fails at practices which defy orders escape detection fail to produce or only loosely hang together in doing so the book problematises and extends the foucauldian notion of biopolitics that has been such a central analytical concept in studies of human animal relations and provides a unique resource of cases and theoretical refinements regarding the ways in which we live together with more than human others

the search for a new foundation of the order of things that characterizes the period between descartes and kant is closely related to three questions what is an animal what is a human what is a machine the various answers that have been given to the questions occur in a field of dynamic interactions between theories of knowledge and of matter experiments observations moral theological and scientific claims analogies metaphors imitations and specific objects or artifacts the main objective of this book is to retrace these interactions within different disciplinary methodological and conceptual perspectives that reach from soul body debates to models of organic molecules fibre bodies and self regulating clocks contributors are tobias cheung charles t wolfe ann thomson hanns peter neumann and yvonne wübben originally published as volume xv nos 1 2 2010 of brill s journal early science and medicine

this textbook provides a full overview of human animal studies it focuses on the conceptual construction of animals in american culture and the way in which it reinforces and perpetuates hierarchical human relationships rooted in racism sexism and class privilege

this collection examines changing perceptions of and relations between humans and nonhuman animals in britain as the contributors pose questions related to modes of representing animals and animal human hybrids gulliver s travels and works by mary and percy shelley emerge as key texts the volume will interest scholars students and general readers concerned with the representation of animals and ethical issues raised by the human uses of other animals

the dramatic transformation of relationships between humans and animals in the 20th century are investigated in this fascinating and accessible book at the

beginning of this century these relationships were dominated by human needs and interests modernization was a project which was attached to the goal of progress and animals were merely resources to be used on the path towards human fulfilment as the century comes to an end these relationships are increasingly being subjected to criticism we are now urged to be more sensitive and compassionate to animal needs and interests this book focuses on social change and animals it is concerned with how humans relate to animals and how this has changed and why moreover it highlights

the internet is made of cats is a half jokingly made claim today animals of all shapes and sizes inhabit our digital spaces including companion animals wildlife feral animals and livestock in this book deborah lupton explores how digital technologies and datafication are changing our relationships with other animals playfully building on the concept of the internet of things she discusses the complex feelings that have developed between people and animals through the use of digital devices from social media to employing animal like robots as companions and carers the book brings together a range of perspectives including those of sociology cultural geography environmental humanities critical animal studies and internet studies to consider how these new digital technologies are contributing to major changes in human animal relationships at both the micropolitical and macropolitical levels as lupton shows while digital devices and media have strengthened people's relationships to other creatures these technologies can also objectify animals as things for human entertainment therapy or economic exploitation this original and engaging book will be of interest to scholars and students across the social sciences and humanities

considering animals draws on the expertise of scholars trained in the biological sciences humanities and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals taking their cue from the specific animal moments that punctuate these interactions the essays engage with contemporary issues and debates central to human animal studies the representation of animals the practical and ethical issues inseparable from human interactions with other species and perhaps most challengingly the compelling evidence that animals are themselves considering beings case studies focus on issues such as animal emotion and human sentimentality the representation of animals in contemporary art and in recent films such as march of the penguins happy feet and grizzly man animals experiences in catastrophic events such as hurricane katrina and the sars outbreak and the danger of overvaluing the role humans play in the earth's ecosystems from marc bekoff's moving preface through to the last essay considering animals foregrounds the frequent sometimes uncanny exchanges with other species that disturb our self contained existences and bring into focus our troubled relationships with them written in an accessible and jargon free style this collection demonstrates that in the face of species extinction and environmental destruction the roles and fates of animals are too important to be left to any one academic discipline

what are our attitudes towards other animals and how does this affect our humanity this work of anthrozoology explores the myriad and evolving ways in which humans and animals interact the divergent cultural constructions of humanity and animality found around the world and individual experiences of other animals this book looks at case studies covering blood sports such as hunting fishing and bull fighting pet keeping and petishism eco tourism and wildlife conservation working animals and animals as food it addresses the idea of animal exploitation raised by the animal rights movements as well as the anthropological implications of

changing attitudes towards animal personhood and the rise of a posthumanist philosophy in the social sciences more generally
