and options like hdr and dolby vision using airplay to beam the display of your mac or iphone screen to your tv making mac iphone or ipad audio play through your tv's speakers making and receiving facetime calls on an apple tv how the new insight feature can show you extra info on actors and music using shareplay to watch shows with friends in other places running home sharing to play media from a local computer using one or more homepods as speakers for your apple tv hosting an apple tv karaoke party using an apple watch to control your apple tv what you can do with conference room display mode how to tell whether an iphone/ipad app includes a free copy of its apple tv version how to reset or restore an apple tv useful for troubleshooting or for handing your device to a new owner

work faster increase your efficiency and have more fun with automation version 5.1 updated january 17 2025 ever wondered if automation could make your life easier in take control of automating your mac fifth edition mac expert joe kissell shows you how to save time and aggravation by using numerous built-in macOS tools as well as helpful third-party apps to automate routine tasks and procedures in looking for ways to work smarter and faster with your mac in this updated and expanded fifth edition of his popular guide to mac automation joe kissell shows how anyone at any level of experience can save time and effort and avoid unnecessary errors by using automation techniques that range from the simplest keyboard shortcut to the most complicated script in this book joe teaches you how to automate routine tasks in a wide variety of ways you can begin by making the most of productivity features such as siri spotlight for launching apps and text replacement and then move on to the more sophisticated automation tools built into macOS such as shortcuts automator applescript services and shell scripts in addition joe gives extensive information about third-party automation apps that can make a huge difference to your work efficiency such as keyboard maestro textexpander omnigraffle and many more as an extra bonus the book includes coupons for discounts on six automation apps whether you're new to automation you just need a refresher or you're experienced with automation but want to go deeper this book can teach you the skills you need to automate with ease take back your time work more efficiently and have more fun with your mac with take control of automating your mac fifth edition with this book you'll learn how to get started

with the built in macos automation tools including shortcuts automator applescript and shell scripts take full advantage of input devices to save clicks and keystrokes customize toolbars and your touch bar to put hard to find controls at your fingertips use your voice to control your mac with siri and voice control dictation commands automate text expansion for faster more consistent typing control the finder with a launcher and by organizing files with hazel supercharge your clipboard to remember and reformat previous copies write macros in microsoft office and nisus writer pro create rules to file email automatically in apple mail and outlook log in to websites faster with a password manager automate cloud services with ifttt and zapier set up automatic backup and syncing run tasks automatically with login items calendar events or launchd use omni automation for javascript based automation tasks control nearly anything on your mac with keyboard maestro

set up a rock solid backup strategy so that you can restore quickly and completely no matter what catastrophe arises version 5 1 updated january 17 2025 joe kissell provides the advice you need to create a mac backup strategy that protects your data and enables quick recovery he compares backup software services and media to help you make the best choices you ll learn to set up test and maintain backups plus how to restore files after a calamity n creating and maintaining a solid backup plan is essential to anyone who uses a mac in order to prevent the loss of important data if disaster strikes whether through hardware or software failure theft human error or other mishap in take control of backing up your mac fifth edition tech expert joe kissell explains how to design a sensible backup strategy choose and configure the best backup hardware and software for your needs and understand how to make your backups as painless as possible his advice is equally useful to those who have never had a backup system and those whose backup systems are in need of an update the book delves into the challenges presented by recent versions of macos m series macs and the ever changing landscape of mac backup hardware software and cloud services it explains what you need to know about bootable and non bootable duplicates backup media and disk formats as well as recent changes in time machine and the weird world of apfs snapshots it also shows you how to include in your backups files and folders that

are stored in the cloud even if there's no local copy of them using this book you'll learn how to design or update the ideal backup system if you're starting from scratch you'll find all the information necessary to assemble a reliable and easy to use backup system if you're updating an existing system you'll learn about what's new in hardware software and online services that might affect the way you back up your mac in the future choose backup software apple's time machine is both free and easy to use but it's not the best choice for everyone and even if you do use time machine you'll certainly want to supplement it with other tools you'll learn about key features to look for in a backup app and find tips on using several popular tools you'll also discover the pros and cons of cloud backup services and get help choosing the right one an online appendix covers dozens of apps and services shop for hardware depending on your needs and goals you may need one or more external ssds or hard drives but the range of options sizes interfaces speeds and more can be bewildering joe helps you find the best backup hardware whether it's individual ssds or hard drives raids nas devices or other options make and maintain backups once you've selected hardware and software you'll need to know how to make your first backup set up your backups to run unattended and test them regularly to make sure they're working as they should this includes both versioned backups which contain old file versions and deleted files and for some users bootable or non bootable data only clones and you'll learn about strategies for keeping extra backups offsite operate time machine if you choose time machine for versioned backups you'll learn how to back up and restore individual files app specific data such as contacts and even an entire disk you'll also discover why and how to encrypt time machine backups how apfs snapshots work inside and outside time machine and what to do if time machine misbehaves deal with unusual backup needs if you deal with exceptionally large files such as audio and video files spend a lot of time on the road away from your usual backup hardware run windows on your mac or rely on cloud services to store essential data you'll want to take extra or different steps to make sure everything is safely backed up you'll also learn various approaches to backing up and restoring data from apple's notes app manage your media what happens when a backup drive fills up or becomes so old that you worry about its future reliability what if you want to archive older files for posterity but not necessarily maintain them as part of your daily backups joe explains how to deal with media

management tasks such as these recover lost data backing up data can be easy but restoring it is often more challenging when you discover that data is missing whether due to a disk error theft or a simple mistake you need to know the exact steps needed to recover it and get back to work as soon as possible
