medieval bridges are startling achievements of civil engineering which prove the importance of road transport and the sophistication of the medieval economy the bridges of medieval england rewrites their history offering new insights into many aspects of the subject it has profound implications for our understanding of pre industrial economy and society challenging accepted accounts of the development of medieval trade and communications and showing continuities from the anglo saxon period to the eve of the industrial revolution

from the time of alfred the great until beyond the end of the middle ages bridges were vital to the rulers and people of england but they were expensive and difficult to maintain who then was responsible for their upkeep the answer to this question changes over the centuries and the way in which it changes reveals much about law and power in medieval england the development of law concerning the maintenance of bridges did not follow a straightforward line legal ideas developed by the anglo saxons which had made the first age of bridge building possible were rejected by the normans and royal lawyers of the thirteenth and fourteenth centuries had to find new solutions to the problem the fate of famous bridges especially london bridge shows the way in which the spiritual historical and entrepreneurial imagination was pressed into service to find solutions the fate of humbler bridges shows the urgency with which this problem was debated across the country by concentrating on this aspect of practical governance and tracing it through the course of the middle ages much is shown about the limitations of royal power and the creativity of the medieval legal mind alan cooper is assistant professor of history at colgate university

please note that the content of this book primarily consists of articles available from wikipedia or other free sources online pages 22 chapters barker crossing bow bridge plox bridge of sighs cambridge castle walk footbridge cathedral green footbridge clapper bridge cobweb bridge corby bridge cox green footbridge gateshead millennium bridge godmanchester chinese bridge infinity bridge kingsgate bridge lune millennium bridge mathematical bridge media city footbridge outwood viaduct penallt viaduct pero s bridge porthill bridge rainbow bridge oxford tarr steps teesquay millennium footbridge tees barrage the rolling bridge white horse bridge wylam railway bridge excerpt the infinity bridge is a public pedestrian and cycle footbridge across the river tees in the borough of stockton on tees in the north east of england the bridge is situated one kilometre downriver of stockton town centre between the princess of wales bridge and the tees barrage and it links the teesdale business park and the university of durham s queen s campus in thornaby on tees on the south bank of the tees with the tees valley regeneration s 320 million north shore development on the north bank built at a cost of 15 million with funding from stockton borough council english partnerships and its successor body the homes and communities agency one northeast and the european regional development fund the bridge is a major part of the north shore redevelopment project undertaken by tees valley regeneration the bridge had the project title north shore footbridge before being given its official name infinity bridge chosen by a panel made from the funding bodies using names suggested

by the public the name derives from the infinity symbol formed by the bridge and its reflection initial investigations for the footbridge were done by the white young green group who with english partnerships produced a brief for an international architectural design

throughout history rivers have been a hub for human settlement and have long been a key part of local livelihoods history and culture as well as still playing a present day role in providing services and leisure to people who live around them it is no coincidence that all four of the earliest human civilizations were formed on great rivers the Nile Euphrates Indus and Yellow Rivers all saw great human aggregation along them the most ancient and vital architectural structures linked to the use of rivers are bridges there are a wide range of medieval bridge structures some very simple in their construction to amazing triumphs of design and engineering comparable with the great churches of the period they stand today as proof of the great importance of transport networks in the middle ages and of the size and sophistication of the medieval economy these bridges were built in some of the most difficult places across broad flood plains deep tidal waters and steep upland valleys and they withstood all but the most catastrophic floods yet their beauty from simplistic to ornate remains for us to appreciate medieval bridges of middle England has been organized geographically into tours and covers the governmental regions of East of England East Midlands and West Midlands there are 62 bridges included and beautiful full color photographs of each bridge are included a brief history is incorporated with each bridge additionally information about the construction materials used and unique features are related as well as historically relevant documents and images directions to each bridge and local attractions are also given there are literally hundreds of bridges in England that meet the criteria for inclusion in this roll of honor for senior bridges they vary vastly in size style and materials most are stone and a very few are brick we have lost many of our older bridges to the ravages of time and the modern practice of culvertisation and urban development a few of our older bridges remain though and their beauty and pivotal role in our history is starting to be recognized
