4th edition of the premier text on local government budgeting revenues and financig

navigating the increasingly complex crosscurrents of local government finance has become an essential skill for today's public administrator. The convergence of rising expectations from citizens and council members, anemic growth in revenue sources and unfunded pensions now coming due has complicated the local manager's task of preparing a budget that balances revenues with expenditures. More fundamentally, today's managers must deliver services at a time when public confidence in government and its ability to perform have reached unparalleled lows. This book examines the issues that a local manager confronts in developing a budget: both the choice of public services and projects to provide and the choice of revenue sources used to pay for them. When formulating a budget, the manager must balance what is economically best, politically expedient, and administratively possible because the manager must also respond to citizens' perceptions of an issue, whatever their accuracy. This book also examines budgets in those terms in a more general sense. Effective leadership requires that the public administrator shape as well as follow public opinion. The recommendations made throughout this book are designed to enhance citizens' confidence in the responsiveness and competence of local government leaders.

A budgeting and resource planning guidance for implementing virtual interventions as part of HIV responses was developed to support countries that would like to initiate, implement, or scale up any of the virtual approaches to strengthen their existing programs. Country stakeholders, including ministries of health, community-based organizations, and civil society organizations, can use this guide to develop budgets and plan resources for any grants that they may be writing in the current challenging times with funding cuts. Across countries, these virtual approaches may act as a mitigation strategy to reduce costs and continue providing services to clients. The unique format of this guide will enable countries to compare their preferences with the case studies used in the guide to determine which approach best suits their needs.

In the Basics of Public Budgeting and Financial Management: A Handbook for Academics and Practitioners, 4th edition, Charles E. Menifield carefully examines the key areas that every budgeting and financial management student needs to know in order to be a successful budgeteer in a local government, nonprofit, or state-level budget office. His analysis includes a discussion of basic budgeting concepts, accounting techniques, a discussion of the budget process, budget techniques, and analytical models. Capital and personnel budgets, financial management, and budget presentations. Homework assignments reinforce the various subjects with practical applications that allow the students to reflect and engage the material in a realistic manner. This book blends budgetary theory and practice in a volume that is easy to understand by both undergraduate and graduate students alike.

This book provides rigorous and provocative understanding of the art and practice of participatory budgeting for those interested in strengthening inclusive and accountable governance.
