blatt's pioneering new book on geomedicine and its exciting capacity to promote health and minimize risk is a robust call for understanding the role of geography for everyone's quality of life in health science and place. A new model of Dr. Blatt's contributions can be summarized in three categories: comprehensive analysis, creative curating, and targeted innovations. Overall, Dr. Blatt's health science and place: a new model is a pathbreaking book challenging all public health and health communication scholars and practitioners to explore vigorously the role of medical geography as a shining new bridge between geography and patient care. John C. Pollock, PhD, MPA, Professor of Health Communication and Human Rights and Faculty Affiliate in Public Health, The College of New Jersey, Ewing, NJ.

Originally published in 1987, this textbook is a comprehensive introduction to the rapidly developing field of medical geography. It illustrates the ideas, methods, and debates that inform contemporary approaches to the subject, demonstrating the potential of a social and environmental approach to illness and health. The central theme is the need to reject an exclusively biological approach to health. The authors examine both the geography of health care and outline a selection of health service planning initiatives in both North America and Europe.

Setting out the debates and reviewing the evidence that links health outcomes with social and physical environments, this new edition of the well-established text offers an accessible overview of the theoretical perspectives, methodologies, and research in the field of health geography. Includes international examples drawn from a broad range of countries and extensive illustrations. Unique in its approach to health geography as opposed to medical geography. New chapters focus on contemporary concerns including neighborhoods and health, ageing, and emerging infectious disease. Offers five new case studies and a fresh emphasis on qualitative research approaches. Written by two of the leading health geographers in the world, each with extensive experience in research and policy.
