human security refers in its broadest sense to the protection of individuals from harm human security theory and action explores the theory and application of concepts central to this notion of security it

examines the conceptual roots of human security connecting its origins to its applications and challenges in war and peacetime with a unique focus on the evolving notion of responsibility for security the text introduces the critical questions and priorities that underpin policies and actions the text is organized around four sections the introduction offers an overview of human security and its basic tenets and historical foundations the second section focuses on human security in armed conflict and post conflict reconstruction discussing such issues as the doctrine of responsibility to protect racial inequality peacekeeping and peace negotiation processes and humanitarian assistance the third section identifies the long term issues that are necessary for a durable human security including human rights food security poverty gender equality health security and environmental sustainability the final section applies the concepts introduced in the book to twenty first century concerns and offers insights on turning theory into action integrated into the text are many case studies to broaden the student s awareness beyond the conflicts and issues that dominate the media by balancing theoretical explanations with concrete illustrative cases both historical and contemporary the text provides intellectually challenging and intrinsically interesting material and offers a unique comprehensive introduction human security in war and peace the second edition of human security theory and action examines the conceptual roots of human security connecting its origins to its application in a time of conflict inequality environmental stress and the aftermath of a global pandemic

this concise text presents a focused well rounded and clear eyed introduction to the concept of human security questioning the utility of traditional national security frameworks in the post cold war era paul battersby and joseph m siracusa argue that we must urgently reconsider the principle of state sovereignty in a global world where threats to humanity are beyond the capacity of any one nation to address through unilateral action the authors highlight circumstances actors and influences beyond the traditional focus on state security especially the role of international organizations and nongovernmental organizations they also emphasize the importance of human rights arguing for the development of an effective intervention capacity to protect individuals from state action as well as other security threats arising from conflict poverty disease and environmental degradation a welcome alternative to state centric approaches to security this balanced book will be a valuable supplement for courses in international and national security

there is a real security gap in the world today millions of people in regions like the middle east or east and central africa or central asia where new wars are taking place live in daily fear of violence moreover new wars are increasingly intertwined with other global risks the spread of disease vulnerability to natural disasters poverty and homelessness yet our security conceptions drawn from the dominant experience of world war ii and based on the use of conventional military force do not reduce that insecurity rather they make it worse this book is an exploration of this security gap it makes the case for a new approach to security based on a global conversation a public debate among civil society groups and individuals as well as states and international institutions the chapters follow on from kaldors path breaking analysis of the character of new wars in places like the balkans or africa during the 1990s the first four chapters provide a context they cover the experience of humanitarian intervention the nature of american power the new nationalist and religious movements that are associated with globalization and how these various aspects of current security dilemmas have played out in the balkans the last three chapters are more normative dealing with the evolution of the idea of global civil society the relevance of just war theory in a global era and the concept of human security and what it might mean to implement such a concept this book will appeal to all those interested in issues of peace and conflict in particular to students of politics and international relations

human security is a new paradigm for security development and justice since it was first proposed in the 1990s there has been an endless debate between its proponents and critics and even among its advocates over the meaning and utility of the concept what is important now is to move the concept beyond the realm of theory and explore its practical applications considering possible policy perspectives and implications this book suggests new practical applications of the human security concept such as human security mapping the human security governance index and human security impact assessment using northeast india and orissa as case studies the methodology introduced in this path breaking book can be applied to conflict zones worldwide by designating the individual rather than the state as the referent object of security human security is emerging as a framework that can serve as a means to evaluate threats foresee crises analyze causes of discord and propose solutions entailing a redistribution of responsibilities

the past decades have seen enormous changes in our perceptions of security the causes of insecurity and

the measures adopted to address the threats of terrorism and the impacts of globalisation and mass migration have shaped our identities politics and world views this volume of essays analyses these shifts in thinking and in particular critically engages with the concept of human security from legal international relations and human rights perspectives contributors consider the special circumstances of non citizens such as refugees migrants and displaced and stateless persons and assess whether conceptually and practically human security helps to address the multiple challenges they face

madness in the multitude explores the nature of human security in the contemporary world at one level human security is about freedom from fear and alleviating the plight of innocent victims of armed conflict civil strife in many corners of the globe east timor bosnia kosovo rwanda burundi sudan georgia tajikistan have witnessed extraordinary violence directed at civilians especially the most vulnerable citizens in society such as women and children international efforts to curb the production and use of anti personnel landmines half the proliferation and spread of small arms and strengthen international prohibitions against the most egregious violations of human rights through the establishment of an international criminal court are directed at augmenting human security but at another level the concept of human security addresses a much wider set of concerns there are those who argue that human security is not just about freedom from fear but also freedom from want and other kinds of deprivation these advocates point to the adverse affects of globalization on human development and the problems of achieving social justice in a world where the forces of globalization have unequal impacts on the distribution of wealth and income according to this view the widening gap between the world s richest and poorest countries is a major cause for concern as are a wide range of nonmilitary threats to human health and survival such as aids water and air borne pollutants and the general deterioration of the biosphere in a wide ranging theoretical and empirical analysis madness in the multitude examines the different meanings and understanding of the concept of human security and how the concept of human security has evolved over the past two centuries through case studies of the international criminal court the anti personnel landmines treaty international efforts to control small arms military intervention in kosovo and elsewhere and the work of international development agencies and lending institutions this book asks whether there is a new human security paradigm of international politics and what the implications of this paradigm for international order are the volume suggests that human security constitutes a new kind of global public good whose provision challenges our traditional conceptions

about the purpose and function of international institutions the role of civil society and the nature of power in international politics this book explores how our conceptions of human security have evolved in the latter half of the twentieth century analyzing the debate about how best to promote and advance human security

tracing the key evolutions in the development of the concept of human security this book contributes to this new multidimensional conception of security showing its strengths and weaknesses as well as its implications for analysis and action

this book provides seven studies that address major issues such as the human rights and human security nexus gender aspects of human security ethical and environmental challenges human security as a basic element for a policy framework the human security agenda developed by the human security network and debates on human security within the united nations building on its variety of themes the book takes account of the complexity and scope of the concept of human security and proposes thereby to refresh and enrich discussion contributors are internationally renowned experts in the different subfields of human security offers an overview of current trends and insights on what is at stake if the international community is to maintain the momentum created a few years ago when the concept of human security emerged designed to help both newcomers and experts in the field of human security readers will find inspiration in the new developments of a concept that aims to shape practical action to meet the needs of the most vulnerable

this handbook will serve as a standard reference guide to the subject of human security which has grown greatly in importance over the past twenty years human security has been part of academic and policy discourses since it was first promoted by the undp in its 1994 human development report filling a clear gap in the current literature this volume brings together some of the key scholars and policy makers who have contributed to its emergence as a mainstream concept including nobel prize winner amartya sen and sadako ogata who jointly chaired the 2001 commission on human security drawing upon a range of theoretical and empirical analyses the handbook provides examples of the use of human security in policies as diverse as disaster management arms control and counter terrorism and in different geographic and institutional settings from asia to africa and the un it also raises important questions about how the concept

might be adapted and operationalised in future over the course of the book the authors draw on three key aspects of human security thinking theoretical issues to do with defining human security as a specific discourse human security from a policy and institutional perspective and how it is operationalised in different policy and geographic contexts case studies and empirical work featuring some of the leading scholars in the field the routledge handbook of human security will be essential reading for all students of human security critical security conflict and development peace and conflict studies and of great interest to students of international security and ir in general

in 1994 the united nations development program undp coined the term human security in the seminal undp human development report this report approached security for the first time from a holistic perspective security would no longer be viewed from a purely military perspective but rather it would encapsulate economic food health environmental personal community and political security although the concept of human security accords a higher status to individual interests rather than to governmental interests human security discourses have continually emphasized the central role of states as providers of human security this volume challenges this paradigm and highlights the part played by non state actors in threatening human security as well as in rescuing or providing relief to those whose human security is endangered the book does so from a legal perspective international law being one of the instruments used to realize human security as well as being a material source or guiding principle for the formation of human security enhancing policies in particular the book critically discusses how various non state actors such as armed opposition groups multinational corporations private military security companies non governmental organizations and national human rights institutions participate in the construction of such policies and how they are held legally accountable for their adverse impact on human security series international law vol 12

this book now available in paperback traces the key evolutions in the development of the concept of human security the various definitions and critiques how it relates to other concepts and what it implies for politics politics and policy human security is an important subject for the whole world in particular asia as it deals with interactions among fields of social change such as development conflict resolution human rights and humanitarian assistance in a globalizing world in which threats become trans national and states lose power security can no longer be studied in a one dimensional fashion written by authors who are experts in this

field and with case studies from different regions afghanistan central asia and south asia presented throughout this book now available in paperback contributes to this new multidimensional conception of security analyzes its strengths and weaknesses and focuses on its implications for analysis and action

a hard headed analysis of the role of the un in translating ideas about human security from theory into practice

this book critically assesses the human security challenges faced by states focusing on how and to what extent the state is influenced by global structures and operations having grown rapidly since the 1990s the field of human security has spawned a wide variety of academic research this research has helped to reconceptualize the notion of security both broadening and deepening it and it has created a space where unconventional and multidimensional forms of security inform international policy practices however while various issues and cases of human security have received growing academic attention and policy interest many of the existing books on human security focus primarily on non state actors this leaves a key question unanswered why do sovereign states take on leadership roles in promoting human security to answer the question of why and how national governments influence international human security policy this volume examines the domestic political factors and structures that mediate the range of policy choices important domestic variables include the cultural match e g does the country often favor multilateralism and promote a rule bound international society the nature of the political interests and realities that are present e g does the country see the promotion of human security as a strategic choice and the occurrence of important historical events such as wars revolutions or natural disasters e g does the country during the crisis help to foster a new way of managing enduring security threats using this line of analysis the book illuminates the role of the state in handling critical human security issues and its rationale for doing so this book will be of much interest to students of human security peace studies global governance development studies and in general

adopting an interdisciplinary perspective freedom from fear freedom from want is a brief introduction to human security conflict and development the book analyzes such key human security issues as climate change crimes against humanity humanitarian intervention international law poverty terrorism and

transnational crime among others the authors encourage readers to critically assess emerging threats while evaluating potential mechanisms of deterrence such as conflict resolution economic development diplomacy peacekeeping international law and restorative justice concise yet comprehensive freedom from fear freedom from want is an ideal text for human security courses

the world turned topsy turvy after covid 19 pandemic the whole equation and thrust of global politics and economics is now at a new verge the main question is now how we can secure human race and humanity this is the main thrust of the book changing dimensions of human security in contemporary world this book is an outcome of collective research work done by erudite scholars from different parts of world like usa russia japan australia romania nigeria nepal bangladesh and india who has come together in search of new trends of human security they touched upon different milieu as well as dimensions of human security and pandemic in contemporary world scenario in thirty two essays forty seven authors collectively explored situation of human security in several domains including international politics law economy labour force sustainable development education gender and may more i believe that this collection of essays can become a benchmark for the future as well as spur new research agendas and projects that will put the region into a much needed conversation on the recent trends of human security in contemporary world this book will try to reimagining this changing dimension of human security in the pandemic situation the goal of this book is to improve the standards of the international community of academicians researchers scholars and scientists by exposing them to the latest trends developments and challenges in the field the volume is essential reading for social scientists bureaucrats and non governmental political activists interested in human security it will also appeal to public policy analysts and scholars who have yet to adopt the contribution of critical security and development studies in the analysis of different dimensions of human security

the book asserts that human security derives from the experience and expectation of human well being which depends on four essential conditions a life sustaining environment the meeting of essential physical needs respect for the identity and dignity of persons and groups protection from avoidable harm and expectations of remedy from them the book demonstrates their integral relationship to human security patriarchy being the germinal paradigm from which most major human institutions such as the state the

economy organised religions and social relations have evolved the book argues that fundamental inequalities must be challenged for the sake of equality and security the fundamental point raised is that expectation of human well being is a continuing cause of armed conflict which constitutes a threat to peace and survival of all humanity and human security cannot exist within a militarised security system the editors of the book bring together 14 essays which critically examine militarised security in order to find human security pathways show ways in which to refute the dominant paradigm indicate a clear gender analysis that challenges the current system and suggests alternatives to militarised security with a mix of female and male feminist scholar activists as contributors the book makes an important contribution to a new discourse on human security

in africa various conditions pose pervasive threats to human security addressing these threats and promoting human security therefore constitute formidable challenges as the paradigmatic shift in the discourse on and practice of human security has led to a change in the normative emphasis from sovereignty and non intervention to responsibility and international humanitarian and human rights norms questions arise not only as to the relationship between human security and human rights but also as to the contribution of the human rights system in addressing human security threats and promoting human freedom what tools does the african human rights system have at its disposal that can be used in the promotion of human security on the continent what are the roles of the african commission and the ahrc in this regard what are the potentials and the challenges how best can these human rights bodies be employed to optimise their contributions to addressing the pervasive human security threats and to promoting the well being of individuals and communities on the continent this monograph investigates these and similar issues including the basic one of the interface between human rights and human security

in the context of the covid 19 pandemic this edited volume revisits the framework of human security and development it examines the protection empowerment nexus as applied to various vulnerable groups and populations affected by the pandemic while the conventional human security literature has focused on top down protection this book offers new perspectives on human security by exploring bottom up empowerment from both theoretical and practical perspectives it also encourages readers to rethink the agency of vulnerable people in addressing the challenges posed by the pandemic through eight case

studies from southeast asia and japan the contributors to this book demonstrate the importance of empowerment in achieving human security they focus on the responses of vulnerable groups and communities to multiple threats to their lives livelihoods and dignity the chapters discuss key human security concerns such as poverty the environment food forced migration gender health aging peace and justice all of which have been compounded and exacerbated by the covid 19 pandemic an essential resource for students and scholars of human security in the aftermath of covid 19 and its wider impacts the open access version of this book available at taylorfrancis com has been made available under a creative commons attribution non commercial no derivatives cc by nc nd 4 0 license funded by jica ogata sadako research institute for peace and development

human security is about everyday realities of violent conflict and poverty humanitarian crises epidemic diseases injustice and inequality it is about freedom from fear and freedom from want it is much different from state related security with its emphasis on military force territory and sovereignty human security places the security of individuals communities and global humanity ahead of the security concerns of the state how does human security relate to international security can human security still be advanced in a global climate of intrastate conflict the war on terror and increasing nuclear tensions this book challenges prevailing security thinking and explores basic standards of humanity this multi authored book deals with the origins and developments of human security as a concept and how it is used in policy practice it presents new approaches by focusing on alternative discourses the actors involved and the new forms of governance that are required it outlines the challenges human security faces in different parts of the world due to conflict terrorism and new wars globalisation and the resurgence of religion development cooperation environmental problems and the role of science facing the challenges this book aims to raise human security out of the status of a contemporary problématique by bringing it closer to a résolutive i am convinced that this book provides an original contribution and a further impetus to developing well grounded academic and policy responses to world wide problems that so urgently require solutions m s swaminathan president pugwash conferences on science and world affairs

this new book presents critical approaches towards human security which has become one of the key areas for policy and academic debate within security studies and in the human security paradigm has had

considerable significance for academics policy makers and practitioners under the rubric of human security security policy practices seem to have transformed their goals and approaches re prioritising economic and social welfare issues that were marginal to the state based geo political rivalries of the cold war era human security has reflected and reinforced the reconceptualisation of international security both broadening and deepening it and in so doing it has helped extend and shape the space within which security concerns inform international policy practices however in its wider use human security has become an amorphous and unclear political concept seen by some as progressive and radical and by others as tainted by association with the imposition of neo liberal practices and values on non western spaces or as legitimizing attacks on iraq and afghanistan this book is concerned with critical perspectives towards human security highlighting some of the tensions which can emerge between critical perspectives which discursively radicalise human security within frameworks of emancipatory possibility and those which attempt to deconstruct human security within the framework of an externally imposed attempt to regulate and order the globe on behalf of hegemonic power the chapters gathered in this edited collection represent a range of critical approaches which bring together alternative understandings of human security this book will be of great interest to students of human security studies and critical security studies war and conflict studies and international relations
