the initial basis of this book was a series of my research papers that i listed in references i have many people to thank for the book s existence regarding higher order asymptotic efficiency i thank professors kei takeuchi and m akahira for their many comments i used their concept of efficiency for time series analysis during the summer of 1983 i had an opportunity to visit the australian national university and could elucidate the third order asymptotics of some estimators i express my sincere thanks to professor e j hannan for his warmest encouragement and kindness multivariate time series analysis seems an important topic in 1986 i visited center for mul tivariate analysis university of pittsburgh i received a lot of impact from multivariate analysis and applied many multivariate methods to the higher order asymptotic theory of vector time series i am very grateful to the late professor p r krishnaiah for his cooperation and kindness in japan my research was mainly performed in hiroshima university there is a research group of statisticians who are interested in the asymptotic expansions in statistics throughout this book i often used the asymptotic expansion techniques i thank all the members of this group especially professors y fujikoshi and k maekawa foithier helpful discussion when i was a student of osaka university i learned multivariate analysis and time series analysis from professors masashi okamoto and t nagai respectively it is a pleasure to thank them for giving me much of research background
