basically the book has been written as a textbook with an intention to serve the students at the graduate and postgraduate level the subject matter is based on the new model curriculum recommended by the university grants commission for all indian universities the book provides an exhaustive list of organic compounds methods of its identification its derivatives every information incorporated in consolidated form exercises included in the book not only describe different methods techniques of preparation but also explain the theoretical background of these reactions it also describes different methods of isolation of some important class of compounds this book promotes self reliance since it is in itself complete requiring no reference to other texts

this book offers a comprehensive overview of the most recent developments in both total oxidation and combustion and also in selective oxidation for each topic fundamental aspects are paralleled with industrial applications the book covers oxidation catalysis one of the major areas of industrial chemistry outlining recent achievements current challenges and future opportunities one distinguishing feature of the book is the selection of arguments which are emblematic of current trends in the chemical industry such as miniaturization use of alternative greener oxidants and innovative systems for pollutant abatement topics outlined are described in terms of both catalyst and reaction chemistry and also reactor and process technology

this is a laboratory text for the mainstream organic chemistry course taught at both two and four year schools featuring both microscale experiments and options for scaling up appropriate experiments for use in the macroscale lab it provides complete coverage of organic laboratory experiments and techniques with a strong emphasis on modern laboratory instrumentation a sharp focus on safety in the lab excellent pre and post lab exercises and multi step experiments notable enhancements to this new edition include inquiry driven experimentation validation of the purification process and the implementation of greener processes including microwave use to perform traditional experimentation

this thoroughly researched book analyses the role of industrial research in dsm s transformations
