in both the united states and france each side of the legal battle over same sex marriage and parenthood relied heavily on experts despite the similarity of issues however lawmakers in each country turned to different sets of authorities from economists and psychoanalysts to priests and ordinary people they even prized different types of expertise empirical research in the united states versus abstract theory in france exploring the legalization of same sex marriage in the united states and france this book sheds new light on the power of experts to influence high stakes democratic debates drawing on extensive interviews and ethnographic observation michael stambolis ruhstorfer traces the divergences between the two countries showing why some experts are ubiquitous in one but absent in the other he argues that lawmakers judges lawyers journalists and activists covet something only experts can provide the credibility and aura of authority or expert capital which they deploy to advance their agendas expert capital is not derived from
