this book constitutes the proceedings of the satellite events held at the xxx semantic conference eswc 2025 held in portoroz slovenia during june 1 2 2025 the 31 posters demos papers are presented together with 12 phd symposium papers and 7 industry papers in this book were carefully reviewed and selected from 43 posters demo papers 15 phd symsposium papers and 14 industry papers the theme of the conference was empowering knowledge through semantics from knowledge graphs to neurosemantics the satellite events are an important aspect of facilitating the main conference discussion as well as fundamental questions about how we acquire represent use and interact with knowledge and semantics the satellite events of eswc 2025 include the poster and demo session the phd symposium the industry track project networking and workshops and tutorials

at its very core multimedia information retrieval means the process of searching for and finding multimedia documents the corresponding research field is concerned with building the best possible multimedia search engines the intriguing bit here is that the query itself can be a multimedia excerpt for example when you walk around in an unknown place and stumble across an interesting landmark would it not be great if you could just take a picture with your mobile phone and send it to a service that finds a similar picture in a database and tells you more about the building and about its significance for that matter this book goes further by examining the full matrix of a variety of query modes versus document types how do you retrieve a music piece by humming what if you want to find news video clips on forest fires using a still image the text discusses underlying techniques and common approaches to facilitate multimedia search engines from metadata driven retrieval via piggy back text retrieval where automated processes create text surrogates for multimedia automated image annotation and content based retrieval the latter is studied in great depth looking at features and distances and how to effectively combine them for efficient retrieval to a point where the readers have the ingredients and recipe in their hands for building their own multimedia search engines supporting users in their resource discovery mission when hunting for multimedia material is not a technological indexing problem alone we look at interactive ways of engaging with repositories through browsing and relevance feedback roping in geographical context and providing visual summaries for videos the book concludes with an overview of state of the art research projects in the area of multimedia information retrieval which

gives an indication of the research and development trends and thereby a glimpse of the future world table of contents what is multimedia information retrieval basic multimedia search technologies content based retrieval in depth added services multimedia information retrieval research summary

the text focuses on providing skills necessary for a foundation in enterprise risk management particularly as these risks pertain toinformation systems and relevant business processes fundamental to an enterprise risk management orientation from an informationsystems perspective are the underlying enterprise systems e business systems and controls for maintaining these systems
