the 52nd colloid and surface science symposium of the division of colloid and surface chemistry of the American Chemical Society was held in Knoxville TN June 12-14 1978 and one of its sections was devoted to the topic of solution chemistry of surfactants although it was billed as the section on solution chemistry of surfactants but it was indeed a veritable international symposium on this topic as 51 papers by about 100 contributors from 12 countries were listed in the program the present volume and its companion volume 2 document the proceedings of the above mentioned section on solution chemistry of surfactants in 1976 there was held an international symposium on micellization solubilization and microemulsions in Albany NY the proceedings of which have been chronicled in two volumes a great deal of material dealing with micelles contributed by a legion of prominent researchers constitutes these volumes but a few subtopics were not adequately covered so it was deemed appropriate to cover these topics as well as the recent progress in the general area of aggregation of surfactants in this section also as it is the amphiphilicity or amphipathicity of a surfactant molecule which is responsible for both adsorption at interfaces and aggregation in solution so it was considered quite apropos to include the topic of adsorption at interfaces in this section concomitantly the present volumes not only cover the aggregation phenomena but also the adsorption at interfaces

this and its companion volume 2 comprise the proceedings of the international symposium on solution behavior of surfactants theoretical and applied aspects organized under the auspices of the 11th northeast regional meeting of the American Chemical Society held in Potsdam NY June 30-July 3 1980 this symposium represented the third event in the series of symposia dealing with the topic of surfactants in solution the first symposium was held in Albany NY in 1976 under the title micellization solubilization and microemulsions 1 the proceedings of which have been documented in a two volume set the second was held under the title solution chemistry of surfactants in 1978 in Knoxville TN and the proceedings of this event have also been properly chronicled apropos the fourth biennial symposium in this series is entitled international symposium on surfactants in solution K. I. Mittal and B. Lindman cochairmen and is scheduled to be held from June 27 to July 2 1982 in Lund Sweden since these biennial events have been very successful and important in bringing researchers with varied interests together and in stimulating interdisciplinary communication so the plans are to continue these on a regular basis with a change in venue for each meeting
