china leads the world when it comes to investment and influence on the african continent the extent of chinese investment in

africa is well known and much has been written about china's foray into africa however most of the available material has approached this issue by looking at china as the new colonialist more interested in africa's vast natural resources than working in partnership for sustained development whilst china's interest in africa's resources is evident it is just half of the story china's foray into africa goes beyond its appetite for natural resources and into the realm of geo politics and international political economics for example china is all too aware of how it can cultivate africa's support on global issues at the united nations and at other international fora breaking free from the binary arguments and analysis which characterize this topic professor abdulai presents a refreshing perspective that china's foray into africa can produce win win outcomes for china and africa if africans really know what they want from china hitherto each african country has tended to engage china with an individual bucket list acting in isolation and not as part of a wider continent indeed africa and the african union does not yet have a coordinated policy towards china for africa to be able to do that it needs to know where china is coming from the factors that contributed to its awakening and success and the benefits and possible pitfalls of this foray in order to better position itself for a win win engagement with china this book will be a valuable read for policy makers think tanks and students of africa china studies programmes alike

beginning with the colonial era western biomedicine has radically transformed african medical beliefs and practices conversely in using western biomedicine africans have also transformed it the african transformation of western medicine and the dynamics of global cultural exchange contends that contemporary african medical systems no less biomedical than western medicine in fact greatly enrich and expand the notion of biomedicine reframing it as a global cultural form deployed across global networks of cultural exchange the book analyzes biomedicine as a complex and dynamic sociocultural form the conceptual premises of which make it necessarily subject to ongoing change and development as it travels the globe david baronov captures the complexities of this cultural exchange by using world systems analysis in a way that places global cultural processes on equal footing with political and economic processes in doing so he both allows the story of africa's transformation of western biomedicine to be told and offers new insights into the capitalist world system
