when the universal declaration of human rights was adopted it was intended that the united nations and other international and regional organizations would follow up on its provisions by adopting legally binding human rights treaties for the practical implementation and protection of human rights on the ground inside countries a solid corps of united nations and regional treaties now exist representing a veritable international code of human rights it is crucial that they be implemented and applied both in letter and in spirit and in good faith in the countries that have ratified or acceded to them the human rights treaties are living instruments and their supervisory bodies apply them

in the light of evolving conditions and circumstances nationally regionally and internationally the treaties and the jurisprudence they generate represent living international human rights law it is important that governments and the general public understand their provisions and the protections they provide this is a defining work on the value of human rights treaties adopted by the united nations and regional organizations comprehensive and written by leading authorities the book brings out dramatically the policy roles and practical value of the treaties in protecting fundamental human rights and the international human rights jurisprudence they generate the book is rich in its discussions of the case law developed by supervisory bodies established under the human rights treaties it also has informed and illuminating discussions of contemporary challenges to the implementation of international and regional human rights conventions this is a historic and defining discussion of the value of human rights treaties and their supervisory bodies

the continuous expansion of human rights can often appear to be positive yet it provokes criticism this volume argues against the internationalisation of human rights proving the world is moving from bilateralism to community interests stating contentious supervision evaluation and substitution are far more common than genuine cooperation

the sage handbook of human rights will comprise a two volume set consisting of more than 50 original chapters that clarify and analyze human rights issues of both contemporary and future importance the handbook will take an inter disciplinary approach combining work in such traditional fields as law political science and philosophy with such non traditional subjects as climate change demography economics geography urban studies mass communication and business and marketing in addition one of the aspects of mainstreaming is the manner in which human rights has come to play a prominent role in popular culture and there will be a section on human rights in art film music and literature not only will the handbook provide a state of the art analysis of the discipline that addresses the history and development of human rights standards and its movements mechanisms and institutions but it will seek to go beyond this and produce a book that will help lead to prospective thinking

the era of technology in which we reside has ushered in a more globalized and connected world while many benefits are gained from this connectivity possible disadvantages to issues of human rights are developed as well defending human rights and democracy in the era of globalization is a pivotal resource for the latest research on the effects of a globalized society regarding issues relating to social ethics and civil rights highlighting relevant concepts on political autonomy migration and asylum this book is ideally designed for academicians professionals practitioners and upper level students interested in the ongoing concerns of human rights

the jurisprudence of the international court of justice generally demonstrates that no rule of international law can be interpreted and applied without regard to its innate values and the basic principles of human rights through its case law the icj has made immense contributions to the development of human rights law and in so doing continues to provide solutions to mounting international problems such as terrorism

and unilateral use of force part i of the book argues that the legislative spirit of contemporary international law lies in the doctrine of human rights and that the spirit of human rights doctrine lies in the principle of human dignity furthermore it argues that the processes of international legislation and international adjudication are inseparable and that there is no norm of international law which does not intertwine the fundamental principle of human dignity with human rights doctrine hence human rights law is more a school of law than merely a normative branch of international law and the icj s willingness to engage in the development of human rights law depends upon which judicial ideology its judges subscribe to in order to evaluate how this human rights spirit is manifested or occasionally not manifested through the vast jurisprudence of the icj parts ii and iii critically examine the court s principal contentious and advisory cases in which it has treated human rights questions the legal reasoning of the court and the opinions appended to its decisions by its individual judges are analysed in light of the principle of human dignity and the doctrine of human rights

focusing on highly topical issues such as torture arbitrary detention privacy and discrimination this book will help readers to understand for themselves the controversies and complexities behind human rights
