why do america s public schools seem unable to meet today s social challenges as competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education public schools were envisioned by the founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools this volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived it both establishes the intellectual foundation for revitalizing american schools and offers concrete ideas for how the educational process can be made more democratic the authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship an initial series of articles reexamines the original premise of american education as articulated by important thinkers like jefferson and dewey a second group identifies flaws in how schools are currently governed and offers models for change a final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy

spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy it offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to america s future

this collection of 24 papers aims to reconsider the nature and significance of the irish sea as an area of cultural interaction during the neolithic period the traditional character of work across this region has emphasised the existence of prehistoric contact with sea routes criss crossing between ireland the isle of man anglesey and the british mainland a parallel course of investigation however has demonstrated that the british and irish neolithics were in many ways different with distinct indigenous patterns of activity and social practices the recent emphasis on regional studies has further produced evidence for parallel yet different processes of cultural change taking place throughout the british isles as a whole this volume brings together some of these regional perspectives and compares them across the irish sea area the authors consider new ways to explain regional patterning in the use of material objects and relate them to past practices and social strategies were there practices that were shared across the irish sea area linking different styles of monuments and material culture or were the media intrinsic to the message the volume is based on papers presented at a conference held at the university of manchester in 2002
