maternal and child health social work health economics educational policy and politics and medical law as well as many interrelated subdisciplines in psychology medicine public health mental health education social welfare economics sociology and law

whilst particularly useful as a companion to the sixth edition of Giddens's sociology the reader is designed for use independently or alongside other textbooks

the field of gerontology has often been criticized for being data rich but theory poor the editors of this book address this issue by stressing the importance of theory in gerontology while the previous edition focused on multidisciplinary approaches to aging theory this new edition provides cross disciplinary integrative explanations of aging theory the contributors of this text have reached beyond traditional disciplinary boundaries to partner with researchers in adjacent fields in studying aging and age related phenomena this edition of the handbook consists of 39 chapters written by 67 internationally recognized experts in the field of aging it is organized in seven sections reflecting the major theoretical developments in gerontology over the past 10 years special features comprehensive coverage of aging theory focusing on the biological psychological and social aspects of aging a section dedicated to discussing how aging theory informs public policy a concluding chapter summarizing the major themes of aging and offering predictions about the future of theory development required reading for graduate students and post doctoral fellows this textbook represents the current status of theoretical development in the study of aging

the essential reference for human development theory updated and reconceptualized the handbook of child psychology and developmental science a four volume reference is the field defining work to which all others are compared first published in 1946 and now in its seventh edition the handbook has long been considered the definitive guide to the field of developmental science volume 4 ecological settings and processes in developmental systems is centrally concerned with the people conditions and events outside individuals that affect children and their development to understand children's development it is both necessary and desirable to embrace all of these social and physical contexts guided by the relational developmental systems meta theory the chapters in the volume are ordered them in a manner that begins with the near proximal contexts in which children find themselves and moving

through to distal contexts that influence children in equally compelling if less immediately manifest ways the volume emphasizes that the child's environment is complex multi dimensional and structurally organized into interlinked contexts children actively contribute to their development the child and the environment are inextricably linked and contributions of both child and environment are essential to explain or understand development understand the role of parents other family members peers and other adults teachers coaches mentors in a child's development discover the key neighborhood community and institutional settings of human development examine the role of activities work and media in child and adolescent development learn about the role of medicine law government war and disaster culture and history in contributing to the processes of human development the scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period there is a paradigm shift that involves increasingly greater understanding of how to describe explain and optimize the course of human life for diverse individuals living within diverse contexts this handbook is the definitive reference for educators policy makers researchers students and practitioners in human development psychology sociology anthropology and neuroscience
