this book is intended to guide practicing structural engineers familiar with earlier aci building codes into more profitable routine designs with the aci 1995 building code aci 318 95 each new aci building code expresses the latest knowledge of reinforced concrete in legal language for safe design application beginning in 1956 with the introduction of ultimate strength design each new code offered better utilization of high strength reinforcement and the compressive strength of the concrete itself each new code thus permitted more economy as to construction material but achieved it through more detailed and complicated design calculations in addition to competition requiring independent structural engineers to follow the latest code for economy it created a professional obligation to follow the latest code for accepted levels of structural safety the increasing complexity of codes has encouraged the use of computers for design and has stimulated the development of computer based handbooks before computer software can be successfully used in the structural design of buildings preliminary sizes of structural elements must be established from handbook tables estimates or experienced first guesses for input into the computer

the industry standard guide to designing well performing buildings architectural detailing systematically describes the principles by which good architectural details are designed principles are explained in brief and backed by extensive illustrations that show you how to design details that will not leak water or air will control the flow of heat and water vapor will adjust to all kinds of movement and will be easy to construct this new third edition has been updated to conform to international building code 2012 and incorporates current knowledge about new material and construction technology sustainable design issues are integrated where relevant and the discussion includes reviews of recent built works that extract underlying principles that can be the basis for new patterns or the alteration and addition to existing patterns regulatory topics are primarily focused on the us but touch on other jurisdictions and geographic settings to give you a well rounded perspective of the art and science of architectural detailing in guiding a design from idea to reality architects design a set of details that show how a structure will be put together good details are correct complete and provide accurate information to a wide variety of users by demonstrating the use of detail patterns this book teaches you how to design a building that will perform as well as you intend integrate appropriate detailing into your designs learn the latest in materials assemblies and construction methods incorporate sustainable design principles and current building codes design buildings that perform well age gracefully and look great architects understand that aesthetics are only a small fraction of good design and that stability and functionality require a deep understanding of how things come together architectural detailing helps you bring it all together with a well fleshed out design that communicates accurately at all levels of the construction process

this manual for civil and structural engineers aims to simplify as much as possible a complex subject which is often treated too theoretically by explaining in a practical way how to provide uncomplicated buildable and economical foundations it explains simply clearly and with numerous worked examples how economic foundation design is achieved it deals with both straightforward and difficult sites following the process through site investigation foundation selection and finally design the book includes chapters on many aspects of foundation engineering that most other books avoid including filled and contaminated sites mining and other man made conditions features a step by step procedure for the design of lightweight and flexible rafts to fill the gap in guidance in this much neglected yet extremely economical foundation solution concentrates on foundations for building structures rather than the larger civil engineering foundations includes many innovative and economic solutions developed and used by the authors practice but not often covered in other publications provides an extensive series of appendices as a valuable reference source for the second edition the chapter on contaminated and derelict sites has been updated to take account of the latest guidelines on the subject including bs 10175 elsewhere throughout the book references have been updated to take account of the latest technical publications and relevant british standards

this book offers not the exemplary rendering of details for design and planning drafts but rather the best rendering for a respective purpose be it at the construction site or the office it targets frequent detailing weaknesses and shows positive examples

FEMA produced this series of 37 fact sheets to provide technical guidance and recommendations concerning the construction of coastal residential buildings. The fact sheets present information aimed at improving the performance of buildings subject to flood and wind forces in coastal environments. Photographs and drawings illustrate national flood insurance program NFIP regulatory requirements, the proper siting of coastal buildings and recommended design and construction practices for building components including structural connections, the building envelope and utilities. Many of the fact sheets also include lists of FEMA and other resources that provide more information about the topics discussed. Where appropriate, resources are accompanied by active web links. A list of the individual fact sheets that are contained in FEMA P-499 follows:

Category 1: General

- Fact sheet no. 1-1: Coastal building successes and failures
- Fact sheet no. 1-2: Summary of coastal construction requirements and recommendations
- Fact sheet no. 1-3: Using a flood insurance rate map
- Fact sheet no. 1-4: Lowest floor elevation
- Fact sheet no. 1-5: V zone design and construction certification
- Fact sheet no. 1-6: Designing for flood levels above the BFE
- Fact sheet no. 1-7: Coastal building materials
- Fact sheet no. 1-8: Non-traditional building materials and systems
- Fact sheet no. 1-9: Moisture barrier systems

Category 2: Planning

- Fact sheet no. 2-1: How do siting and design decisions affect the owner's costs?
- Fact sheet no. 2-2: Selecting a lot and siting the building

Category 3: Foundations

- Fact sheet no. 3-1: Foundations in coastal areas
- Fact sheet no. 3-2: Pile installation
- Fact sheet no. 3-3: Wood pile to beam connections
- Fact sheet no. 3-4: Reinforced masonry pier construction
- Fact sheet no. 3-5: Foundation walls

Category 4: Load paths

- Fact sheet no. 4-1: Load paths
- Fact sheet no. 4-2: Masonry details
- Fact sheet no. 4-3: Use of connectors and brackets

Category 5: Wall systems

- Fact sheet no. 5-1: Housewrap
- Fact sheet no. 5-2: Roof to wall and deck to wall flashing
- Fact sheet no. 5-3: Siding installation in high wind regions
- Fact sheet no. 5-4: Attachment of brick veneer in high wind regions

Category 6: Openings

- Fact sheet no. 6-1: Window and door installation
- Fact sheet no. 6-2: Protection of openings, shutters and glazing

Category 7: Roofing

- Fact sheet no. 7-1: Roof sheathing installation
- Fact sheet no. 7-2: Roof underlayment for asphalt shingle roofs
- Fact sheet no. 7-3: Asphalt shingle roofing for high wind regions
- Fact sheet no. 7-4: Tile roofing for high wind areas
- Fact sheet no. 7-5: Minimizing water intrusion through roof vents in high wind regions
- Fact sheet no. 7-6: Metal roof systems in high wind regions

Category 8: Attachments

- Fact sheet no. 8-1: Enclosures and breakaway walls
- Fact sheet no. 8-2: Decks, pools and accessory structures
- Fact sheet no. 8-3: Protecting utilities

Category 9: Repairs

- Fact sheet no. 9-1: Repairs, remodeling, additions and retrofitting flood
- Fact sheet no. 9-2: Repairs, remodeling, additions and retrofitting wind

Category G: Guide

- Fact sheet no. G-1: Technical fact sheet guide
