following fritjof capra s arguments in the tao of physics this book seeks to draw a connection between western mysticism and theoretical physics specifically between string theory and the hebrew esoteric tradition of qabala arguing that the structure of space time is defined by the qabalistic tree of life modern theories developed to combine the incompatible theories of relativity and quantum mechanics nearly always postulate that the universe is defined in more dimensions than we are aware of 10 in the super symmetrical string theories and 11 in m theory and 11d supergravity this implies that in addition to the four dimensions from special relativity there exist six more compactified onto a 6d complex geometry
