articles include expository or survey papers focusing on important advances in applied or computational mathematics

or papers outlining the mathematical and computational challenges in scientific or engineering applications other features include essays book reviews classroom and industrial notes and problems and solutions

the papers of the 2005 interdisciplinary conference at dartington hall

to byrd and his sixteenth century contemporaries technique was the means of expressing the composer s thought but it was also an artistic achievement in itself a vehicle exactly contrived for the delivery of its message and an essential part of that message with this in mind the author analyses the major aspects of byrd s technique illustrating his discussion with numerous music examples the comparisons which are inevitably made at every stage between byrd s practice and that of his predecessors and contemporaries at home and abroad make the book in an important sense a general survey of polyphonic vocal technique during the period this will further enhance its value for students of the golden age of vocal polyphony
