Harry Truman's administration began searching for an American response to the clash in Indochina between French colonialism and Vietminh communism in 1945. Thirty years and five administrations later, Gerald Ford and his aides tried unsuccessfully to solicit additional aid for South Vietnam from a reluctant Congress. For Truman, Ford, and every American leader in between, the dilemma in Vietnam hung ominously over the presidency in shadow on the White House. Seven prominent historians examine how the leadership of six presidents and an issue that grew into a difficult and often unpopular war shaped each other, focusing on the personalities, politics, priorities, and actions of the presidents as they confronted Vietnam. The authors consider the expansion of presidential power in foreign policy formulation since World War II. In their analyses, they chronicle the history of executive leadership as it related to Vietnam, assess presidential prerogatives and motives on war and peace issues, and clarify the interconnection between the modern presidency and the nation's frustrating, tragic, and humiliating failure in Southeast Asia. Although other histories have been written about the Vietnam experience, this book is the first systematic and comparative survey on presidential leadership as it relates to the war issue. It is organized by presidential administrations, giving a detailed examination of each president's decisions and policies based on the most recently opened archival sources. The essays provide a framework on which to hang the kaleidoscopic events of the war. Amazon.com

essay from the year 2017 in the subject geography earth science economic geography grade 17 university of Cologne language English abstract just 8 men own same wealth as half the world with this title. Oxfam published its annual study on global inequality in January this year. Even if the exact calculation of their numbers is controversial, the report itself is shocking. In answer to this news, the scientific debate about global inequalities as well as economic convergences which emerge within the structures and processes of our global capitalism break out again. The Nobel laureate Joseph Stiglitz, for example, blames global capitalism for this development and sends an appeal for strengthened corporate social responsibility. In this essay, I therefore want to examine to which extent global capitalism can be seen as the producer of uneven development rather than of economic convergence. Since the early 1980s, the winds of global capitalism became stronger. It was a period where developing countries with their mostly inward-looking and nationalistic policies suffered deep crisis like the Latin American debt crisis as of the early 1980s or the collapse of the Soviet bloc in 1991. During this era, neoliberal economies of the more developed world built the hegemonic power.
