since 1898 the united states and the united nations have deployed military force more than three dozen times in attempts to rebuild failed states currently there are more state building campaigns in progress than at any time in the past century including afghanistan bosnia kosovo the democratic republic of congo haiti sudan liberia cote d ivoire and lebanon and the number of candidate nations for such campaigns in the future is substantial even with a broad definition of success earlier campaigns failed more than half the time in this book paul d miller brings his decade in the u s military intelligence community and policy worlds to bear on the question of what causes armed international state building

campaigns by liberal powers to succeed or fail the united states successfully rebuilt the west german and japanese states after world war ii but failed to build a functioning state in south vietnam after the cold war the united nations oversaw relatively successful campaigns to restore order hold elections and organize post conflict reconstruction in mozambique namibia nicaragua and elsewhere but those successes were overshadowed by catastrophes in angola liberia and somalia the recent effort in iraq and the ongoing one in afghanistan where miller had firsthand military intelligence and policymaking experience are yielding mixed results despite the high levels of resources dedicated and the long duration of the missions there miller outlines different types of state failure analyzes various levels of intervention that liberal states have tried in the state building process and distinguishes among the various failures and successes those efforts have provoked

bringing together scholars from art history visual studies and related disciplines this edited volume asks why trumpism looks the way it does and what that look means for american and global society grouped into six categories the essays in this volume tackle some of the most perplexing and urgent aspects of the trumpist visual project two of the most striking aspects of that project are its use of novel commodity forms including the iconic red baseball caps as well as its embrace of social media trump s outlandish persona and striking physicality have lent themselves to caricature both from his critics and perhaps more surprisingly his supporters that physicality as well as his movement s hearkening back to a mostly imagined era of mid twentieth century prosperity has also brought gender and the body into sharp focus perhaps second only to the aforementioned red hat is trumpism s vigorous use of interventions into public space including traditional campaign signs as well as flags and other ad hoc visual and architectural materials finally there were the events of january 6 2021 when many of trumpism s most outré visual and cultural preoccupations exploded from the shadows onto television screens across the country taken as a whole the essays in this book examine trumpist

visuality from the seemingly trivial to the starkly horrifying as well as offering a measured sense of the various resistances and responses that have characterized artistic responses to trump from the beginning of his prominence the book will be of interest to scholars working in art history visual culture american studies and cultural and media studies
