allowing students to truly grasp the functions and frequent dysfunctions of America's foreign policy agenda this book has long set the standard in guiding students through the complexities of the field

during World War II the Japanese government created a research bureau the Chō Sabu to study occupied Singapore the bureau's reports on Singapore's economy and society reproduced here in translation covered population and living standards prices wages currency and inflation rationing labour usage food production and supply and industrialization Syonan's military and civilian administrators drew on Chō Sabu research in formulating social and economic policy the research takes on

added importance because the japanese destroyed most records of their wartime administration that leaves the ch sabu reports as one of the few first hand japanese sources to have survived the war the translation allows a fuller understanding of the impact of the war and occupation than hitherto possible introductory chapters by the editors analyse the reports in light of wartime events in singapore and japanese occupation policies and discuss the ch sabu authors and their place in the history of japanese economic thought

grunden s analysis of this fundamental flaw in the japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of world war ii comparing the science and weapons programs of all the major combatants he demonstrates that japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries in the end japan could not overcome these obstacles and thus failed to make the transition to the kind of big science it needed to ward off its enemies and dominate the far east book jacket

individual liberty is ingrained in american culture yet in contrast to this cherished ideal american men were inducted into military service under a system that flourished for more than twenty years before its rationalization was seriously questioned by more than a small minority of citizens analyzing this paradox george flynn provides the first comprehensive look at an institution that managed to sustain political and public favor through two wars before dying out under a barrage of protests during a third placing the american draft within a historical context he shows how social and political considerations determined the character of conscription in the united states the draft developed as it did he argues not mainly because of military needs or strategy but because of political decisions initiated by civilians with nonmilitary agendas explaining why the draft remained relatively immune to political criticism prior to the vietnam conflict flynn chronicles the draft s military and strategic successes and failures in america s mid century wars he shows how major institutions and lobbies representing science education and various professions and religions influenced it and how ultimately and ironically the selective character of the draft eventually made the system inequitable and helped cause its downfall book jacket title summary field provided by blackwell north america inc all rights reserved

the german wehrmacht was one of the most capable fighting forces the world has ever known but in the end it was no match for the allies some historians contend that the allies achieved victory through brute force and material superiority but as peter mansoor argues all of the material produced by us industry was useles without trained soldiers to operate it a coherent doctrine for its use and leaders who could effectively command the formations into which it was organized

his book tells not only how victory was gained through a combination of technology tactics and army navy cooperation but also how the new guinea campaign exemplified the strategic differences that plagued the pacific war since many high ranking officers considered it a diversionary tactic rather than a key offensive

an estimated 50 million people perished in world war ii millions across the globe fled war zones to be replaced by soldiers of all creeds and backgrounds the war changed the world as technology raced ahead this was matched by political change the final end of old empires and the growth of new superpowers
