What is literary theory? Is there a relationship between literature and culture? In fact, what is literature and does it matter? These are some of the questions addressed by Jonathan Culler in this very short introduction to literary theory, often a controversial subject said to have transformed the study of culture and society in the past two decades. Literary theory is accused of undermining respect for tradition and truth and encouraging suspicion about the political and psychological implications of cultural projects rather than admiration for great literature. Here Jonathan Culler explains theory not by describing warring schools but by sketching key moves theory has encouraged and speaking directly about the implications of theory for thinking about literature, human identity and the power of language. In this new edition Culler takes a look at new material including the death of theory, the links between the theory of narrative and cognitive science, trauma theory, ecocriticism and includes a new chapter on ethics and aesthetics. This lucid introduction is useful for anyone who has wondered what all the fuss is about or who wants to think about literature today. About the series: The very short introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas and enthusiasm to make interesting and challenging topics highly readable.

This innovative introduction to literary studies takes the life of texts as its overarching frame. It provides a conceptual and methodological toolbox for analysing novels, poems and all sorts of other texts as they circulate in oral, print and digital form. It shows how texts inspire each other and how stories migrate across media. It explains why literature has been interpreted in different ways across time. Finally, it asks why some texts fascinate people so much that they are reproduced and passed on to others in the form of new editions, in adaptations to film and theatre and last but not least in the ways we look at the world and act out our lives. The life of texts is designed around particular issues rather than the history of the discipline as such. Each

chapter concentrates on a different aspect of the life of texts and introduces the key debates and concepts relevant to its study the issues discussed range from aesthetics and narrative to intertextuality and intermediality from reading practices to hermeneutics and semiotics popular culture to literary canonisation postcolonial criticism to cultural memory key concepts and schools in the field have been highlighted in the text and then collected in a glossary for ease of reference all chapters are richly illustrated with examples from different language areas
