central government office estate comprises over 5 million m<sup>2</sup> of space and costs around 1.8 billion a year to run rationalisation of the estate therefore offers the public sector the chance to secure significant efficiency savings from 2004 to 2010 central government departments have made savings of around 100 million each year on the cost of offices however government's use of space is still relatively inefficient the government property unit was established in 2010 to accelerate efficiency savings from the estate but it has not provided the leadership necessary to deliver an effective cross government approach until property is seen by departments as a cost as well as an asset the vast potential savings will not be realised the unit needs to make it in the interests of departments to work together and to do so it needs the support of the treasury which so far has been far too passive three further areas where the unit needs to show far greater leadership are also highlighted first the bulk of public sector estate belongs to local government and the unit needs to ensure that central and local government work more collaboratively second the unit needs to centralise property ownership and start to negotiate terms with major landlords on a more standardised basis finally consolidating the estate will inevitably lead to the mothballing of buildings and current market conditions are making it difficult to re let surplus space there is though no point in the government simply holding property in the hope of a future rise in property prices
