excerpt from a manual of engineering specifications and contracts designed as a text book and work of reference for all who may be engaged in the theory or practice of engineering in preparing a piece of work for letting the duties of the engineer are manifold he must first of all have a clear conception of the thing to be done and must give graphical expression to this idea both by drawings and writing it then becomes necessary to inform himself as to the probable cost of the proposed work and if within reasonable limits and he desire to let it he must next notify contractors and others by such public announcements as will reach the largest number of reliable parties it is thus seen that the preparation of the drawings estimates specifications and advertisements are all duties of the engineer which he has heretofore been allowed to learn as necessity required and often on the spur of the moment but his duties do not end here to insure the rapid and faithful execution of the work he generally prepares the form of bid with certain instructions to bidders giving restrictions with which they must comply to render their bids valid and finally to adopt a form of agreement which shall be approved by both parties to the contract the duties of the contractor are simply to examine drawings and specifications or the site of the work present his bid and if successful sign the contract and furnish the required securities the construction of the work is foreign to the object of this book these six steps are developed more fully in the corresponding chapters which follow about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from the engineers manual this work originated from the conception that the practicing engineer or engineering student would welcome a consolidation of the formulas and constants for which he is accustomed to search through several volumes and that the application of each formula might be explained more concisely than in texts devoted exclusively to the process of derivation with this end in view those engineering formulas mathematical operations and tables of constants which appear to be most useful are presented in systematic order and in a size of book designed to fit the pocket each formula is preceded by a statement in which its application the symbology of the involved physical quantities and definite units of measurement are indicated it is believed that this method of presentation increases the speed of selection and understanding of a desired formula and insures greater accuracy of substitution since data units of any kind may be converted into specified units by reference to the table of conversion factors the sequence of the formulas is based generally upon their order of derivation so that the understanding of a formula may be enlarged by inspection of the formulas which precede it all catchwords symbols and formulas are printed in full face type and each formula or group of formulas is numbered to facilitate reference to the text or cross reference between formulas about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
