analyzing computer systems performance is a tedious and recurring task of system administrators programmers and project managers this work makes this difficult subject understandable executable and manageable

to solve performance problems in modern computing infrastructures often comprising thousands of servers running hundreds of applications spanning multiple tiers you need tools that go beyond mere reporting you need tools that enable performance analysis of application workflow across the entire enterprise that s what pdq pretty damn quick provides pdq is an open source performance analyzer based on the paradigm of queues queues are ubiquitous in every computing environment as buffers and since any application architecture can be represented as a circuit of queueing delays pdq is a natural fit for analyzing system performance building on the success of the first edition this considerably expanded second edition now comprises four parts part i contains the foundational concepts as well as a new first chapter that explains the central role of queues in successful performance analysis part ii provides the basics of queueing theory in a highly intelligible style for the non mathematician little more than high school algebra being required part iii presents many practical examples of how pdq can be applied the pdq manual has been relegated to an appendix in part iv along with solutions to the exercises contained in each chapter throughout the perl code listings have been newly

formatted to improve readability the pdq code and updates to the pdq manual are available from the author s web site at perfdynamics com

understanding the conditions under which variability in performance may arise and the processes related to its emergence gives us insight into the development of techniques for improving the quality of performance this book introduces a comprehensive framework for understanding human performance variability in terms of how human control of behavior is closely tied to design factors in the performance environment empirical evidence as well as practical examples and application areas introduced in support of this framework the book provides suggestions on how individuals groups and organizations can significantly reduce variability in human performance that often leads to systems failures

perl for the provides tools and strategies to improve the performance of existing applications in perl with case studies and real world examples it also provides principles and ideas that help programmers create an extensible framework for future growth special attention is given to upcoming technologies including integration the wireless and xml based automation

i have great pleasure in presenting the proceedings of the 10th european photovoltaic solar energy conference held in lisbon from 8 to 12 april 1991 these proceedings contain all the scientific papers delivered at the conference the following is a short summary of the conference activities the conference was opened by the minister of industry and energy of portugal eng luis mira do amaral at the opening ceremony the becquerel prize created by the commission of the european communities was awarded to professor werner bloss of the university of stuttgart and presented by professor philippe bourdeau director at the directorate general for science research and development the becquerelle lecture delivered by professor bloss constituted the scientific opening to the conference about 760 delegates from 53 countries presented around 350 contributions 50 of them as plenary lectures the contributions were selected among the many papers submitted this time more strictly than ever before also a selected group of scientists were invited to deliver 15 review lectures to provide an adequate context to the contributions to the conference a symposium on photovoltaics in developing countries which was very well attended took place as a parallel event the symposium provided an opportunity to hear not only experts of the industrialized countries but also speakers from the countries where photovoltaics provides services of paramount value
