integrated research is about achieving holistic understanding of complex biophysical and social issues and problems it is driven by the need to improve understanding about such systems and

to improve resource management by using the results of integrated research processes traditional research tends to fragment complex problems focusing more on the pieces of problems rather than the whole that comprises multiple interrelationships and interactions the outcome is that a lot is known about the parts e g recreation fish and wildlife but relatively little about how they are interrelated there seems to be general agreement that integrated questions must drive the search for integrated understanding but tradition inertia institutional culture budgets training and lack of effective leadership foster reductionism at worst or minimal degrees of integration at best rather than any substantial sustainable effort toward integrated research in this paper a phased approach to framing integrated research questions and addressing the substantial barriers that impede integrated efforts are discussed a key conclusion is that to make any significant progress toward comprehensive integrated research will require more than rhetoric progress must begin with more effective leadership throughout various levels of research organizations
