ecclesiastical spaces rather than religious art reflecting christian ideology current practices frequently initiate projects that question the values and traditions of the host space or present objects and events that challenge its visual conventions in the light of these developments this book asks what conditions are favourable to enhancing and expanding the possibilities of church based art and how can these conditions be addressed what viable language or strategies can be formulated to understand and analyse art s role within the church focusing on concepts drawn from anthropology comparative religion art theory theology and philosophy this book formulates a lexicon of terms built around the notion of encounter in order to review the effective uses and experience of contemporary art in churches the author concludes with the prognosis that art for the church has reached a critical and decisive phase in its history testing the assumption that contemporary art should be a taken for granted element of modern church life art and the church a fractious embrace uniquely combines conceptual analysis critical case studies and practical application in a rigorous and inventive manner dealing specifically with contemporary art of the past twenty five years and the most recent developments in the church s policies for the arts

philosophy of religion too often confines itself to a few well worn philosophical puzzles such as the proof of god s existence and overworked examples which are usually drawn from western christianity this book considers religion practice and expression in a number of cultural contexts both familiar and exotic from sacred texts to rites of passage from the british israel movement to spiritism and aztec devil worship the author argues that although there are many points on which religious persons disagree and no definite way of settling these disagreements neoplatonic theory about the world and our place in it does at least provide the context for debate is religion an irrational

human attempt to disguise an essentially meaningless universe or is irreligion itself unreasonable and a spiritual universe the best explanation using a wide range of examples the mysteries of religion provides an invaluable philosophical background for a discussion of such fundamental questions

in this era of increased knowledge the essence of religious phenomena eludes the psychologists sociologists linguists and other specialists because they do not study it as religious according to mircea eliade they miss the one irreducible element in religious phenomena the element of the sacred eliade abundantly demonstrates universal religious experience and shows how humanity s effort to live within a sacred sphere has manifested itself in myriad cultures from ancient to modern times how certain beliefs rituals symbols and myths have with interesting variations persisted

religion like any other domain of culture is mediated through symbolic forms and communicative behaviors which allow the coordination of group conduct in ritual and the representation of the divine or of tradition as an intersubjective reality while many traditions hold out the promise of immediate access to the divine or to some transcendent dimension of experience such promises depend for their realization as well on the possibility of mediation which is necessarily conducted through channels of communication and exchange such as prayers or sacrifices an understanding of such modes of semiosis is therefore necessary even and especially when mediation is denied by a tradition in the name of the ineffability of the deity or of mystical experience this volume models and promotes an interdisciplinary dialogue and cross cultural perspective on these issues by asking prominent semioticians historians of religion and of art linguists sociologists of religion and philosophers of law to reflect from a semiotic perspective on the topic of mediation and immediacy in religious traditions

this volume aims to revitalize the exchange between sociological differentiation theory and the sociology of religion which previously held center stage among the sociological classics it brings together contributions from different disciplines as well as various forms of regional and historical expertise which are indispensable in forming a globally oriented sociological perspective today secularization is understood as a process of boundary demarcation that is as the enactment of semantic practical and institutional distinctions between religion and other spheres of activity and knowledge these distinctions may emerge from within the religious field itself or may be absorbed into the field having originally emerged elsewhere they may even be directly imposed upon religion by external forces the volume is therefore based on the premise that societal differentiation and secularity as a specific expression of it is a widespread structural feature that nonetheless takes on various forms depending on its historical and cultural context in order to make this diversity visible the volume adopts a global comparative perspective and examines historical distinctions and differentiations in the west and beyond by examining different forms and modes of secularity in statu nascendi the volume contributes to developing a better understanding of the diversity of secularities even of those found in the present day in terms of their historicity and their specific path dependencies with this shift in perspective this special volume initiates a global and historical turn in the theory of differentiation as well as in the study of secularity
