researched work on the technical and popular meaning and understanding of dharma from the early brahmanic buddhist and jain perspectives

buddhism originated as an antinomial system facing the opposition of both vaidika and theistic brahmins who socially identified themselves with the agrarian world the two models of society generated in early historical india never merged and buddhism was gradually and often violently reduced to impotence it was gupta rule that first checkmated the antinomial model of the buddhists whereas in the open society traders landowners and tribals coexisted from gupta times onwards pressure on kings and direct brahmanical rule led to the requisition of land and the imposition of a varna state society doctrinal debates which soon turned into ordeals were instrumental in the suppression of the buddhist elite mainly formed by intellectuals of brahmanical descent this being proof of a dramatic rift in the brahmanavarna the vajrayana which was the buddhist response to this state of affairs originated and grew under pala rule and expansionism and was characterized by a decisive opening towards the outcast and the theorization of violence this set off a conflict whose scope and significance are still poorly understood it was eventually the compromise between the orthodox powers and the muslims that caused the final downfall of buddhism the former were obliged to transfer political power to the latter but had a free hand in social repression the book draws mainly on brahmanical sources both literary and iconographic which are abundant and insufficiently exploited as well as or archaeological evidence hardly every resorted

the present volume is an outcome of the expert discussion on the theories of brahmanism and buddhism in an international meet at jnana pravaha philosophical and artistic interaction between the two have been brilliantly discussed with references to famous places as well as texts to unravel basic principles

this book is concerned with the complex and indeed difficult question of the relationship between buddhism and brahmanism hinduism vedism shivaism vishnuism etc in india and between buddhism and local religious cults in tibet and certain other parts of the buddhist world including japan although they are clearly not identical twins brought forth by the indian religious soil buddhism and brahmanism hinduism are closely related siblings thus questions arise concerning the function and significance of the so called hindu gods and godlings as they appear in substantial parts of the buddhist tradition as well as the traditional local divinities in other buddhist lands in this connection borrowing and syncretism have often been referred to by writers on the subject but in fact these religious interrelationships appear to be considerably more complicated and interesting than this in much of buddhist thought they possess both salvific soteriological and gnoseological implications the concept of symbiosis seems relevant here as it expresses these special interrelationships more adequately in addition other concepts both etic and emic are considered in this context in buddhist thought the structurally opposed yet complementary emic concepts of the mundane or worldly and the supramundane or transmundane have often defined the religious relationship under discussion therefore in this volume this pair of categories is explored the laukika and the lokotrara or the jig rten pa and the jig rten las das pas as they are respectively referred to in the traditions of india and tibet drawing on a number of indian and tibetan sources gedruckt mit unterstützung des fonds zur forderung der wissenschaftlichen forschung
