The second edition of *Counseling Psychology and Children* takes a multidimensional four part approach to counseling children. This approach 1 capitalizes on the relationships children build with parents, teachers and other adults. 2 looks at children's developmental processes. 3 examines multicultural influences upon them and 4 takes into consideration the variety of intervention models available. Four chapters examine four major approaches to child therapy: psychodynamic, child centered, behavioral, cognitive behavioral and family systems. In the final synthesizing chapter the author draws upon his experience as therapist and teacher to bring everything together through a case study that shows his multidimensional approach in action.
