what intelligent person has never pondered the meaning of life for yuval lurie this is more than a puzzling philosophical question it is a journey and in this book he takes readers on a search that ranges from ancient quests for the purpose of life to the ruminations of postmodern thinkers on meaning he shows that the question about the meaning of life expresses philosophical puzzlement regarding life in general as well as personal concern about one s own life in particular lurie traces the emergence of this question as a modern philosophical quandary riddled with shifts and turns that have arisen over the years in response to it tracking the meaning of life is written as a critical philosophical investigation stretching over several traditions such as analytic philosophy phenomenology and existentialism it maps out a journey that explores pivotal responses to this question drawing especially on the thought of tolstoy wittgenstein sartre and camus and exploring in depth the insights these thinkers offer regarding their own difficulties concerning the meaning of life in the book s four sections lurie discusses tolstoy s challenge to experience the religious and transcendental meaning of life by choosing a simple

hardworking existence wittgenstein's focus on ethics and discovering the sense of the world his conclusion that the question of the meaning of life makes no sense and his turning to experience the mystical aspect of the world sartre's positing of freedom as the basis of human life stipulating a personal answer to the question of the meaning of life and camus view of the absurdity of life unalleviated by any personal meaning guided by these views luria imparts new insight to ideas that underlie our concern with life's meaning such as the difference between attitudes toward life and beliefs and opinions about life the meaning of words versus the meaning of events shared meanings versus personal meanings and the link between ethics and personal identity tracking the meaning of life is no mere dry philosophical study but a journey that dramatically illustrates the poignancy of the quest for meaning showing that along the way it gradually becomes more obvious how personal meaning may be found in the pulsations of everyday life the book offers stimulating reading not only for scholars in philosophy but also for general readers who wish to see how their personal concerns are echoed in modern philosophical thought more than a description of a journey it is a map to anxieties and puzzlements we all face pointing to ideas that can guide readers on their own search for meaning

the problem this project attempts to solve is to develop a workable moral education in light of the clash between religious forms of moral education and us supreme court decisions concerning them the concept of story and storytelling has been suggested as a unifying focus for disparate prescriptions for moral education several recent approaches to moral storytelling have been proposed the approaches of william bennett nel noddings and herbert kohl are among those which have attempted to combine moral education and storytelling within the last decade bennett is identified with other theorists whose primary concern is the moral content of a story noddings is identified as a process theorist whose primary concern is the process of moral storytelling not the content kohl is identified as a reflection theorist whose approach challenges tradition in the hope of creating a more moral society each one of these three approaches attempts to provide a comprehensive program of moral education but they fall short of that goal the purpose of this project then is to construct a storytelling moral education program that improves upon earlier approaches using the three levels of moral thinking posited by r m hare a three level approach to moral storytelling is proposed the intuitive critical and meta ethical levels of moral thinking that hare refers to are used to frame a new three level approach to moral storytelling the three level approach combines content process and reflection into a unified prescription for moral education thus a more comprehensive plan for moral education through

storytelling is developed one that respects traditional forms of moral education while remaining within the parameters set by the u s supreme court
