this book examines the cross linguistic expression of changes of location or state taking as a starting point talmy's typological generalization that classifies languages as either

satellite framed or verb framed in verb framed languages such as those of the romance family the information about the predicate is encoded by the verb satellite framed languages on the other hand can be further subdivided into weak satellite framed languages in which the information is expressed by a prefix on the verb and strong satellite framed languages in which it is expressed by a preposition in this volume Víctor Acedo Matellán explores the similarities between Latin and Slavic in their expression of events of transition neither allows the expression of complex adjectival resultative constructions and both express the result state or location of a complex transition through prefixes they are therefore analysed as weak satellite framed languages along with ancient Greek and some varieties of Mandarin Chinese and stand in contrast to strong satellite framed languages such as English the Germanic languages in general and Finno-Ugric this variation is explained in terms of the morphological properties of the head expressing transition path which is argued to be prefixal in weak but not in strong satellite framed languages on the other hand in verb framed languages like Romance path is strictly adjacent to the eventive head *v* the analysis is couched in a neo constructionist approach to argument structure which accounts for the verbal elasticity shown by Latin and a distributed morphology approach to the syntax morphology interface
