this book both articulates and responds to increasing scholarly interest in the materiality of
 the book taking as its base the unique collection of mathematical books in the russell library at
 maynooth it addresses questions related to printing techniques and print culture book production
 provenance and reading practices it considers the histories of individual items of the russell
 collection their previous locations and owners and explores ways in which annotations
 underlinings hand drawn diagrams and the like reveal patterns of reading and usage finally it
 seeks to elicit more information on a previously under researched topic the historical role of
 mathematics in the extensive network of irish colleges that once covered catholic europe located
 in places such as salamanca rome douai and prague alongside delivering important new insights
 into print culture as a medium for transmitting scientific ideas mathematical book histories is
 thus also intended to contribute to a broader understanding of the role and significance of
 mathematics in the context of clerical instruction and more broadly in the academic tradition of
 ireland up to the beginning of the twentieth century many of the volumes in the russell library
 reflect the remarkably rich book trade that flourished in seventeenth and early eighteenth
 century dublin and which was quite distinct from that in london booksellers often bought in their
 wares directly from abroad with the result that publications could enter collections that did not
 enter the purview of contemporary english or scottish scholars in britain

it has become increasingly clear that numbers is the litmus test for new ideas relating to the
 formation of the pentateuch at the same time the profusion of ideas has only resulted in a
 corresponding lack of agreement between scholars in the present study jordan davis grants

significant attention to the geographical references found at the end of the book of numbers combining archaeological historical and literary critical insights in the attempt to arrive at more verifiable results with a detailed view at the transjordan conquest traditions num 21 21 35 32 deut 2 24 3 20 and the twin legal narratives relating to zelophehad s daughters num 27 36 the author argues for the historical catalysts underlying these traditions and then points to the ideological motivation behind their redactional expansion
