the manual includes about one hundred questions most in multiple parts and drawn from several years of exams at bocconi university on the models is lm is lm pc etc and

topics the macroeconomic equilibrium of a closed economy the labor market and unemployment inflation the open economy government debt economic growth covered by most introductory courses on macroeconomics the main objective of the problems is to help readers grasp the economic reasoning and intuition underlying the main conclusions of the discipline the aspect of macroeconomics and more in general of economics that students find the most difficult to master but that will turn out to be the most useful in their future

practical macroeconomics for non economists provides the tools the theory and the empirical understanding of macroeconomics without the heavy lifting of the mathematical and econometric models this accessible book introduces the building blocks of macroeconomic thinking and challenges the reader to apply these insights to learn why economists say what they do and what guides economic policymakers linking actual data to theoretical concepts it explores competing economic theories and uncovers some of the key controversies in macroeconomic theory and how different perspectives lead to alternative and vastly different policy recommendations key features include coverage of all the key macroeconomic topics such as gdp inflation unemployment output and productivity business cycles aggregate demand supply and fiscal and monetary policy question and answer format covering the foundations of each topic in a logical progression to provide the reader with a quick reference and more focused discussion advanced questions to encourage deeper discussion start of chapter learning objectives which allow the reader to see the road ahead for each section end of chapter issues to think about boxed features which offer the reader an opportunity to apply critical thinking to the issues covered resource manual and powerpoints for instructors practical macroeconomics for non economists is the ideal textbook for anyone looking for a practical and non technical introduction to the subject

central banks and other policymaking institutions use causal hypotheses to justify macroeconomic policy decisions to the public and public institutions these hypotheses say that changes in one macroeconomic aggregate e g aggregate demand cause changes in other macroeconomic aggregates e g in inflation an important perhaps the most important goal of macroeconomists is to provide conclusive evidence in support of these hypotheses if they cannot provide any conclusive evidence then policymaking institutions will be unable to use causal hypotheses to justify policy decisions and then the scientific objectivity of macroeconomic policy analysis will be questionable the book analyzes the accounts of causality that have been or can be proposed to capture the type of causality that underlies macroeconomic policy analysis the empirical methods of causal inference that contemporary macroeconomists have at their disposal and the conceptions of scientific objectivity that traditionally play a role in economics the book argues that contemporary

macroeconomists cannot provide any conclusive evidence in support of causal hypotheses and that macroeconomic policy analysis doesn't qualify as scientifically objective in any of the traditional meanings the book also considers a number of steps that might have to be taken in order for macroeconomic policy analysis to become more objective the book addresses philosophers of science and economics as well as macro economists econometricians and statisticians who are interested in causality and macro econometric methods of causal inference and their wider philosophical and social context

axel leijonhufvud has made a unique contribution to the development of macroeconomic theory this volume draws together his insightful essays dealing with the extremes of economic instability great depressions high inflation and the transition from socialism to a market economy in several of the papers leijonhufvud brings a neo institutionalist perspective to the problems of coordination in economic systems the papers within macroeconomic instability and coordination some of them already considered classics deal with the questions that dominated leijonhufvud's interest throughout his career as an economist what are the limits to an economy's capacity to coordinate the activities of its members how does the behavior of the system change under extreme conditions in what ways does its performance depend upon the institutions that govern the market process

this book traces the history of macroeconomics the evolution of macroeconomic thought and the resulting theory and policy the book places the various macroeconomic theories in the order in which they developed chronologically and illustrates the similarities and differences of the models starting with classical economics and the keynesian revolution this book explores the macroeconomic theory after keynes open economy macroeconomics economic policy and sectoral functions financial officers and professionals making pecuniary decisions and analyses

offering a unique blend of solid theoretical content and student accessibility this text stands apart with its emphasis on intriguing applications that convey the prevalence of economics in everyday life by applying economics to phenomenon that students are familiar with and interested in this book demonstrates like no other text how economic analysis can be applied to virtually anything of interest thus helping students develop true economic intuition additional student oriented features include a unique active learning format an emphasis on developing economic analysis skills and an outstanding visual program for exhibits and graphs content highlights include balanced presentation of major macro theories a micro presentation that centers around the trilogy of objectives constraints and choices thorough integration of international topics and fully integrated internet features that offer hands on exercises for exploring economics on line macroeconomics 5e is also available in a micro split

and both micro macro are in the principles text

this study seeks to construct a basic reinforcement learning based ai macroeconomic simulator we use a deep rl drl approach ddpq in an rbc macroeconomic model we set up two learning scenarios one of which is deterministic without the technological shock and the other is stochastic the objective of the deterministic environment is to compare the learning agent s behavior to a deterministic steady state scenario we demonstrate that in both deterministic and stochastic scenarios the agent s choices are close to their optimal value we also present cases of unstable learning behaviours this ai macro model may be enhanced in future research by adding additional variables or sectors to the model or by incorporating different drl algorithms
