a weekly record of scientific progress

the astronomy of the carolingian era has commonly been represented as concerned exclusively with computus the science of calendar construction as well as arithmetical calculation in general this volume shows the error of that portrayal by exploring the study and teaching of four roman texts on astronomy and cosmology in the carolingian world and the diagrams connected to those texts as each of these works came into use over the carolingian era its contributions merged into a progressively more ordered picture of the heavens both eccentrics and epicycles appeared by the 840s these techniques were subsequently introduced clearly and qualitatively to complete the carolingian enterprise the primary tool for understanding this effort is the analysis of their diagrams medieval and early modern science vol 8

a systematic integrated exploration of the relationship between science and technology and modern society from a sociological and philosophical perspective
