contractility is crucial regardless of the specific condition

2 Condition Practice

Practice Kaplan provides practice exams but don't limit yourself to those. Seek out additional resources like NCLEXRN review books many cover similar content and online question banks. The more questions you answer the better you'll become at identifying patterns and recognizing key information.

2 Developing Effective Study Techniques

Active Recall

Instead of passively rereading notes try to recall information from memory. Use flashcards practice questions or teach the concepts to someone else.

Spaced Repetition

Review material at increasing intervals. This technique strengthens memory retention over time. Use apps like Anki to schedule your reviews effectively.

Focus on Weak Areas

Identify your areas of weakness through practice exams and dedicate more time to mastering those topics. Don't neglect your strengths but prioritize improvement in areas where you struggle.

3 Understanding the Question Types

Kaplan exams often incorporate various question formats: multiple choice, select all that apply, prioritization, and even case studies. Familiarize yourself with each type and practice answering them efficiently.

Here's a breakdown:

Multiple Choice

Eliminate incorrect answers first. Focus on key words and qualifying phrases.

Select All That Apply

Read each option carefully and independently. Don't assume answers based on previous selections.

Prioritization

Consider the urgency and importance of each task based on patient safety and needs. Use Maslow's hierarchy of needs as a guideline.

Example Prioritization Question

A nurse is caring for four patients. Which patient should the nurse assess first?

A A patient with stable angina reporting mild chest discomfort

B A patient with a new onset of shortness of breath and oxygen saturation of 88

C A patient with a postoperative wound that is slightly red and draining

D A patient with diabetes who is experiencing mild hypoglycemia

Answer B The patient with new onset shortness of breath and low oxygen saturation requires immediate attention due to potential respiratory distress.

3 4 Simulating Exam Conditions

Take practice exams under timed conditions to simulate the actual testing environment. This helps to build your stamina manage your time effectively and reduce test anxiety.

Visual The Ideal Study Setup

Imagine a clean organized workspace a comfortable chair good lighting your Kaplan materials neatly arranged a bottle of water and perhaps some healthy snacks. Minimize distractions put your phone on silent and create a focused study

environment

When confronted with a challenging question break it down systematically

- 1 Read the question carefully Identify the key elements and what is being asked
