this timely book offers a world history of insurgencies and of counterinsurgency warfare jeremy black moves beyond the conventional western centric narrative arguing that it is crucial to ground contemporary experiences in afghanistan and iraq in a global framework unlike other studies that begin with the american and french revolutions this book reaches back to antiquity to trace the pre modern origins of war within states interweaving thematic and chronological narratives black probes the enduring linkages between beliefs events and people on the one hand and changes over time on the other hand he shows the extent to which power politics technologies and ideologies have evolved creating new parameters and paradigms that have framed both governmental and public views tracing insurgencies ranging from china to africa to latin america black highlights the widely differing military and political dimensions of each conflict he weighs how and why lessons were learned or rather asserted in both insurgency and counterinsurgency warfare at every stage he considers lessons learned by contemporaries the ways in which norms developed within militaries and societies and their impact on doctrine and policy his sweeping study of insurrectionary warfare and its counterinsurgency counterpart will be essential reading for all students of military history

with the attacks of september 11th by a transnational global terrorist network the full danger of this new security threat was revealed the initial response of the u s government to this threat resulted in the birth of the global war on terrorism gwot since its birth the gwot has taken center stage as the default foreign policy and national security strategy of the united states in the execution of this strategic construct the united states has deployed its military instrument of power to two regional conflicts afghanistan and iraq and numerous other low level special operations throughout the globe this monograph examines the effectiveness of the gwot and its current relevancy as a strategic concept after more than 6 monograph addresses the background and origins of gwot to include the arguments for and against its use and its strengths and weaknesses as a strategic construct it specifically examines the current security environment in which the gwot is being applied and finds it to be insufficient the author proposes that the security environment is more accurately defined as a global insurgency conducted by a transnational terrorist network with global reach further the best way to address this security environment is to replace the construct of gwot with a global counterinsurgency coin strategic framework in doing so the author replaces the primacy of terror or terrorism as the overarching threat with a clear identification of the enemy al qaeda and associated groups and movements the research delves into the strategic goals and operational objectives of al qaeda and assesses its effectiveness as a global insurgency using the criteria

master s thesis from the year 2011 in the subject politics topic peace and conflict security grade 70 100 university of malta course international relations language english abstract this dissertation explore the threats posed by al qaeda in afghanistan and whether it is first necessary to stabilize this country in order to eliminate the group it will be argued that al qaeda s ideology has now become stronger than its ability to threaten international security that its aim to become an agent of change within the muslim world has come to outweigh the threat attributed to it as a conventional kinetic terrorist entity the current instability within afghanistan is not due to al qaeda s physical presence there but rather an amalgamation of factors it will be argued that the u s led invasion in 2001 has contributed to al qaeda s weakening there but it has not contributed to stabilize afghanistan itself the instability in afghanistan will require a strong long term commitment by the international community while the fight against al qaeda will require more focus on combating its ideology and less on military action whilst al qaeda remains an elusive enemy for the west due to its ability to constantly adapt the international community has failed to adapt adequately to not only combat al qaeda s ideology but also to implement the necessary long term strategy that is required to achieve stability in afghanistan

research paper undergraduate from the year 2007 in the subject politics international politics region usa queen s university belfast language english abstract this paper analyzes modern insurgency and emphasizes some of the difficulties and dilemmas in contemporary counter

insurgency policy making in iraq the analysis starts with the definition s and structural components of an insurgency differences between classic and modern insurgencies are underlined with the aim of presenting the evolution and adjustability of insurgent warfare modern insurgency is becoming increasingly networked transnational tactical and diverse in its methods conventional means are increasingly used against soft targets causing maximum loss and damage a metastasis of warfare from the rural terrain to the urban domain has complicated efforts to counter violence the paper argues that the question over doctrine versus flexibility in counter insurgency policy making should be thoroughly re examined given that insurgencies are social events deeply rooted in the social and economic conditions of a society responses to violence should focus on breaking the very conditions leading to radicalization and recruitment expanding the scope of counter insurgency beyond military engagement devising timely responses and negotiating with local militant actors are much more important aspects for ending a crisis that could escalate into insurgency or civil war

much praised for being both accessible and scholarly john rourke s text uses current examples to illustrate theories the eleventh edition has been meticulously revised to recognize new scholarship and to update coverage of world events and trends including elections in iraq israel s withdrawal from gaza the defeat of the e u constitution by french and dutch voters the tsunami in indonesia the first investigations of the international criminal court corruption in the un s oil for food program and growing u s china tensions over china s arms program

critiques the pentagon s counterinsurgency field manual which offered a blueprint for mobilizing the cultural expertise of anthropologists for the war in iraq explores the ethical and intellectual conflicts of the pentagon s human terrain system and probes the increasing militarization of academic knowledge

taking the form of a report card state of the struggle assesses the west s progress across a wide array of counterterrorism imperatives from ethical questions of balancing security and core values to the problems of creating viable counterterrorism coalitions to the likelihood of terrorist use of biological chemical and nuclear weapons the report examines a wide swath of issues necessary to create workable counterterrorism strategies
