ever since charles darwin first published the origin of species on november 24 1859 the subject of origins has been one of the most controversial topics around sadly it also is a subject that is fraught with erroneous theories and concepts most students today are taught that organic evolution is not a theory but a fact that all reputable scientists accept disclaimers from the evolutionary community notwithstanding such a claim is quite simply wrong we believe it is time for someone to offer what renowned news commentator paul harvey would call the rest of

the story that is what the truth about human origins does it tells the rest of the story as it discusses the scientific facts about mankind's beginning for example it investigates the record of the rocks as that record relates to human evolution it demonstrates how evolutionary theory is unable to explain things like the origin of gender and sexual reproduction the origin of language and communication the origin of the brain the mind and human consciousness and the origin of skin colors and blood types it also examines in an in depth fashion the so called molecular evidence of human evolution
