the subject of international environmental law is fraught with debate over its legitimacy and efficacy if laws without enforcement are merely good advice then how can the environment be meaningfully protected by international legal institutions this book examines that question through the lens of marine conservation focusing on the sea shepherd conservation society sscs and the captain paul watson foundation cpwf as non state actors intervening directly to enforce international marine conservation laws the book unfolds in three parts moving from soundings which explores the legal and historical foundations of marine conservation law to currents which traces the emergence of direct action enforcement and its necessity in instances where states lack the means will or jurisdiction

to act and finally to horizons which looks ahead to the emerging landscape of ocean governance beyond the state in these later chapters the book examines the increasing criminalization of environmental activism the rise of indigenous led and decentralised enforcement models and the plural legal imaginaries reshaping what legitimacy might mean in a post sovereign world grounded in bio and ecocentric legal theory and drawing on legal analysis political critique and detailed campaign case studies the book challenges the assumption that enforcement is the sole domain of the nation state instead it argues that legitimacy may derive not from formal authority but from the courage to uphold laws that institutions have abandoned in doing so this book reframes direct action as being essential to the law s integrity the upholding of a shared responsibility to conserve our oceans for when legality becomes illusion resistance may be the most just act of all in this sea of fallen standards the pirate flag may be the only one worth flying

climate change is now doing far more harm than marooning polar bears on melting chunks of ice it is damaging the health of people around the world brilliantly connecting stories of real people with cutting edge scientific and medical information changing planet changing health brings us to places like mozambique honduras and the united states for an eye opening on the ground investigation of how climate change is altering patterns of disease written by a physician and world expert on climate and health and an award winning science journalist the book reveals the surprising links between global warming and cholera malaria lyme disease asthma and other health threats in clear accessible language it also discusses topics including climategate cap and trade proposals and the relationship between free markets and the climate crisis most importantly changing planet changing health delivers a suite of innovative solutions for shaping a healthy global economic order in the twenty first century

many people believe that globalization and its key components have made matters worse for humanity and the environment indur m goklany exposes this as a complete myth and challenges people to consider how much worse the world would be without them goklany confronts foes of globalization and demonstrates that economic growth technological change and free trade helped to power a cycle of progress that in the last two centuries enabled unprecedented improvements in every objective measurement of human well being his analysis is accompanied by an extensive range of charts historical data and

statistics the improving state of the world represents an important contribution to the environment versus development debate and collects in one volume for the first time the long term trends in a broad array of the most significant indicators of human and environmental well being and their dependence on economic development and technological change while noting that the record is more complicated on the environmental front the author shows how innovation increased affluence and key institutions have combined to address environmental degradation the author notes that the early stages of development can indeed cause environmental problems but additional development creates greater wealth allowing societies to create and afford cleaner technologies development becomes the solution rather than the problem
