despite extensive research policies and practical efforts to improve college readiness in the united states a large proportion of low income students remain unprepared to enter and succeed in higher education this issue draws on the human ecology theory of urie bronfenbrenner 1917 2005 to offer a fresh perspective that accounts for the complexity of the interacting personal organizational and societal factors in play ecological principles shift the focus to individual differences in the ways that students engage environments and to the connections across students immediate settings and relationships viewing college readiness within an ecological system also reveals how the settings where development occurs are in

turn shaped by more distant environments the aspirations and behaviors that affect students college preparation originate in opportunities resources and hazards beyond their immediate environments the ecological lens illuminates the need for coordinated comprehensive efforts that affect students across the various levels of their environment and provides a framework for advancing college readiness research policy and educational practice this is the 5th issue of the 38th volume of the jossey bass series ashe higher education report each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences topics are identified by a national survey noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication

roughly one third of all u s high school graduates do not enroll in college soon after earning a diploma there are many reasons why students do not do so including work obligations affordability concerns and lack of academic preparation yet research suggests that many of these students often aspire to a college education helping these students turn aspiration into action is a policy priority for states one important factor in successful transitions for high school to college is demonstration of college readiness traditionally measured by course seat time however as one strategy to enhance student transitions from high school to college statewide and system wide admission policies are beginning to assess college readiness through multiple measures this education trends report reviews these multiple measures provides a deeper look at competency based assessments and offers policy considerations for state and system leaders key takeaways include 1 at least 18 states have complete or partial alignment between high school graduation course requirements and statewide or system wide admission standards 2 instead of completing coursework a growing number of states allow high school students to pass competency based assessments to demonstrate mastery of subject content and 3 state k 12 and higher education leaders should continue to work closely and explore and evaluate more effective measures to gauge students college readiness and chances of success

create programs that prepare students for college careers and the new and challenging assessments of the common core state standards written for all educators but with an emphasis on those at the secondary level this important resource shows how to develop programs that truly prepare students for both the common core assessments and for college and career readiness based on multiple research studies conducted by conley as well as experience he has gained from working with dozens of high schools that succeed with a wide range of students the book provides specific strategies for teaching the ccss in ways that improve readiness for college and careers for the full range of students draws from research based models for creating programs for high school students that will ensure readiness for tests and for college and beyond includes strategies and practices for teachers to help students develop postsecondary preparedness is the third in a series of books on readiness written by david conley including college knowledge and college and career ready teachers can use this valuable resource to understand the big picture behind the common core state standards how to teach to them in ways that prepare students for new challenging assessments being implemented over the next few years and more importantly how to help all students be ready for learning beyond high school

the new u s national standards movement has pushed us at warp speed from common core curriculum standards to updated assessments for college readiness but we have not fully

examined what it means to be college ready why is it that roughly half of all high school students need remedial classes before being considered ready for college level work current public policies aim to eliminate the need for remedial college classes by ratcheting up instruction and expectations at the k 12 level but if we do not find out what these students are missing how can we expect to be successful for higher education scholars and practitioners and those generally interested in the future of college this book helps tell a novel story about the transition to college from the perspective of an experienced college professor the first year experience is conceptualized as a two way relationship between students and colleges involving introductions resistance or acceptance collaboration and exchange of ideas and learning there are both success stories and stories that end in a parting of ways these stories show what college readiness really means and offer valuable insights about the academic social monetary and other forces that can overwhelm the typical college bound student higher education scholars and professionals will benefit from these rich and detailed accounts as they help shape the landscape of 21st century college readiness

an important question in preparing all students for college and career by the time they graduate from high school is that of determining how much growth in academic achievement typically occurs during high school and whether such growth can be accelerated so that more students are ready for college and career when they graduate from high school this study examined the average scores of a sample of approximately 150 000 students who participated in the three programs that make up the longitudinal assessment component of act s college readiness system explore r for students in grades 8 and 9 plan r for students in grade 10 and the act r test for students in grades 11 and 12 each program contains four subject tests english mathematics reading and science with respect to racial ethnic composition geographic region and annual family income the demographic characteristics of the student sample roughly approximate those of the population of high school students nationwide findings indicate that in the typical high school today the level of academic achievement that students attain by eighth grade has a larger impact on their college and career readiness by the time they graduate from high school than anything that currently happens academically in the typical u s high school this research demonstrates that it is necessary to intervene with students who are not on target for college and career readiness before high school in the upper elementary grades and in middle school contains 2 footnotes 2 figures and 2 tables
