over 1.6 million students have succeeded using this book more than any other EMT basic training text for over thirty years. Emergency Care has provided students with clear, complete coverage of the US DOT EMT basic national standard curriculum. The ninth edition provides updated content, a new interior design, and enhanced pedagogical features to keep pace with today's students' needs and advances in prehospital care. A state-of-the-art multimedia package featuring a student CD-ROM and a text-specific companion website provides students with greater coverage of chapter material.

The general aim of ROMED1 is to improve the quality and effectiveness of the work of school health employment and community mediators with a view to supporting better communication and co-operation between Roma and public institutions, school health care providers, employment offices, local authorities, etc. The ROMED1 Trainer's Handbook was developed over five years of implementation of the ROMED1 programme and is generally intended for trainers who followed a course of training for trainers in the framework of the programme. However, it can also be used by organisations, governmental or non-governmental, as a basis for new or adapted curricula for those working in a mediation context with or within Roma communities. It contains the key information trainers need to give a training course based on the ROMED1 methodology and on the human rights-based approach. The content of the materials should be adapted to the specific context of each country and to the profile of the mediators.
