a must for anyone considering the study of archaeology designed to provide the reader with everything they should know when embarking on an archaeological course whether a level or first year undergraduate

archaeology the basics rewritten for this fourth edition is a short engaging book that takes the reader on a journey through the fascinating world of archaeology and archaeologists written in a non technical style by two experienced archaeologists and writers about the past the book begins by introducing archaeology as a unique way of studying the entire span of the human past from our origins some six million years ago to today the authors stress that archaeology is a global study of

human biological and cultural diversity after a brief look at early archaeological discoveries they introduce today's multidisciplinary archaeology then they go on to describe the archaeological record the archives of the past and the importance of contexts of time and space how do we find archaeological sites and how do we explore them two chapters laced with examples examine these questions later chapters describe ancient technologies and how we study them and the all important subject of changing ancient environments and climate change zooarchaeology flotation methods and other ways of reconstructing ancient diet and subsistence lead us into the study of changing settlement patterns across the landscape next they visit the people of the past either as individuals or groups calling on bioarchaeology to assist them two chapters discuss ancient culture change and the remarkable diversity of ancient societies and they are followed by an exploration of the spiritual realm the exploration of the intangible the final chapter looks at the importance of archaeology in today's world rich in numerous examples and contemporary thinking about archaeology this book tries to answer an important question what does archaeology tell us about ourselves archaeology the basics is essential reading for all those beginning to study archaeology and anyone who has ever questioned the past

the contributors to this volume themselves from six continents and many representing indigenous and minority communities and disadvantaged countries suggest strategies to strip archaeological theory and practice of its colonial heritage and create a discipline sensitive to its inherent inequalities

provides information on over three hundred common college majors from accounting to zoology including related fields prior high school subjects possible courses of study and career and salary prospects for graduates

this volume provides new insights into the distinctive contributions that community archaeology and heritage make to the decolonization of archaeological practice using innovative approaches the contributors explore important initiatives which have protected and revitalized local heritage initiatives that involved archaeologists as co producers rather than leaders these case studies underline the need completely reshape archaeological practice engaging local and indigenous communities in regular dialogue and recognizing their distinctive needs in order to break away from the top down power relationships that have previously characterized archaeology in africa community archaeology and heritage in africa reflects a determined effort to change how archaeology is taught to future generations through community based participatory approaches archaeologists and heritage professionals can benefit from shared resources and local knowledge and by sharing decision making with members of

local communities archaeological inquiry can enhance their way of life ameliorate their human rights concerns and meet their daily needs to build better futures exchanging traditional power structures for research design and implementation the examples outlined in this volume demonstrate the discipline s exciting capacity to move forward to achieve its potential as a broader more accessible and more inclusive field

david hurst thomas presents a welcome alternative to the third person accounts found in archaeology texts on the market with his passionate down to earth introduction to archaeological method and theory by including his own fieldwork among the many examples the author with a voice gives students real insights into the practice of archaeology this text emphasizes the importance of seeking multiple perspectives and explanations to understand the past the author s vast experience discovering and excavating hundreds of archaeological sites provides students with an exciting look at the practice of archaeology today

sagalassos speaks to the imagination in more ways than one the authentic and natural beauty of the site no doubt plays a role in that the sagalassos project testifies to the fact that its core business archaeology also appeals to the imagination learning about the past is fascinating for young and old alike curiosity unquestionably plays a role in this archaeologists as any other scientist are driven to really know about past human activities as they leave no stone unturned in their endeavours archaeologists also stimulate the curiosity of society the public at large is not only interested in the results per se but also wants to understand how knowledge about the past comes about this volume gives the word to the archaeologists and other scientists of the sagalassos archaeological research project they explain their ways methods and concepts as they reconstruct and interpret the past of the archaeological site of sagalassos and the surrounding study region by bringing testimony to the broader discipline of archaeology this book deserves to be read by scholars and students with an open interest in classical archaeology who wish to re discover some of the basics of the science and process it will also be of interest to professionals involved with archaeologists and the wider interested public

within the domain of social science archaeology is devoted to unraveling the tapestry of human history both recorded and prehistoric as well as human existence itself this pursuit is achieved through meticulous examination of diverse elements including material culture architecture eco facts artifacts biofacts and cultural landscapes the primary methodologies employed in this field include excavation remote sensing utilization of drones computational archaeology among others additionally this expansive field comprises various sub disciplines such as ethnoarchaeology experimental archaeology

cultural resources management archaeometry and historical archaeology the topics included in this book on archaeology are of the utmost significance and bound to provide incredible insights to readers most of the topics introduced herein cover new techniques and the processes in archaeology this book with its detailed coverage will prove immensely beneficial to professionals and students involved in this area at various levels

this innovative guidebook introduces archaeologists to the complexities and possibilities of educating children in archaeology the book explains the culture of the educational system discusses the interface between education and archaeology forewarns of sensitive and inflammatory issues and provides real world examples of a variety of successful archaeology education programs throughout the emphasis is on exemplary programming that meets the needs of students educators and archaeologists in a realistic achievable manner published in cooperation with the society for american archaeology

an assembly of rhetoric on the tension between archaeology and cultural anthropology the former often considered merely a sub field of the latter and an examination of the degree to which the relationship between the two studies may have actually inhibited archaeological investigations

archaeology a brief introduction 10th edition i s an introduction to the fundamental principles of method and theory in archaeology whil exposing students to archaeology as a career the text begins by covering the goals of archaeology going on to consider the basic concepts of culture time and space and discussing the finding and excavation of archaeological sites the author provides a distinct emphasis on the ethics behind archaeology and how we should act as stewards of the finite records of the human past archaeology 10 e is a book with an truly international perspective not simply focusing on north america or europe this brief book is ideal for the introductory archaeology classroom as it is designed for complete beginners keeping technical jargon to a minimum without sacraficing scholarship this is a standalone book if you want the book access code order the isbn below isbn0205696988 9780205696987 archaeology a brief introduction myanthrokit access card package package consists of 0205633382 9780205633388 archaeology a brief introduction 0205693776 9780205693771 myanthrokit access card

in this book the author presents his findings connected with the archaeology of the rajmahal hills jharkhand state north eastern india and discusses the wider relevance of his surface archaeology approach to the archaeology of the rest of the

tribal areas of india he also approaches the issue of a gendered study of rock art and landscape archaeology both of which again fall within the domain of tribal archaeology proper the author also has a keen interest in the theory of history and archaeology and writes about this subject in several of the chapters further sections engage in theoretical debates regarding the relationship between history and archaeology the study concludes that it may be possible to delineate a separate domain for the archaeology of the tribal areas called subaltern archaeology the present work breaks further new ground in historical and archaeological research in terms of the fieldwork undertaken in the rajmahal hills and elsewhere in india the novel idea being that the tribal population of india does have a long term past an issue thus far relatively rarely investigated
