since the publication of the still very valuable biblioteca histórica de la filología by cipriano muñoz y manzano conde de la viñaza madrid 1893 our knowledge of the history of the study of the spanish language has grown considerably and most manuscript and secondary sources had never been tapped before hans josef niederehe of the university of trier courageously undertook the task to bring together any available bibliographical information together with much more recent research findings scattered in libraries journals and other places the resulting bibliografía cronológica de la lingüística la gramática y la lexicografía del español desde los principios hasta el año 1600 bicres began appearing in 1994 bicres i covered the period from the early beginnings to 1600 followed by bicres ii 1601 1700 bicres iii 1701 1800 and together with miguel Ángel esparza torres of madrid there followed bicres iv 1801 to 1860 now the fifth volume has become available covering the years from 1861 to 1899 access to the bibliographical information of altogether 5 272 titles is facilitated by several detailed indexes such as a short title index a listing of printers publishers and places of production and an author index more than twenty years of research in the major libraries of spain and other european countries have gone into this unique work relative sources of the americas have also been covered making it exhaustive source for any serious scholar of any possible aspect of the spanish language

reclaiming al andalus focuses on the construction of the scholarly discipline of orientalist studies in spain special attention is paid to the impact that the elaboration of a series of historical interpretations of the legacy left by muslim and jewish culture in spain had over the writing of national history in the period of the bourbon restoration a historiographical account of spains orientalism tackles the problematized issues that both arabist and hebraist scholars sought to address orientalist scholarship thereby became inextricably linked to different interpretations of the historical shaping of spanish national identity political circumstances of the day impacted on the approach these scholars took as they engaged with the iberian semitic past and this at a critical moment in the crystallization of modern spanish nationalism a common thread running through the work of these orientalist scholars was the tendency to nationalize or hispanicize cultural activity of the semitic populations that lived on the iberian

peninsula in medieval times this hispanization was instrumentalized in diverse ways in order to serve nation building efforts hence orientalist scholarship became integrated into the national debates that were shaping spanish cultural and political life at the turn of the century reclaiming al andalus explains how regenerationist projects taking form after the national crisis of 1898 and different polemical discussions around religion state affairs deeply influenced the writings of academic orientalism the intertwined connection between orientalist scholarship and nationalist debates in spain has hitherto been understudied this book not only contributes to the general debate on modern orientalism but most importantly presents a profound new viewpoint to the ongoing debate on the conflictive history of spanish nationalism
