the mystery of the guardian and the threshold he protects belong among the central most significant themes on the path of modern initiation for without the encounter with the guardian the threshold to the spiritual world can never be crossed in full consciousness the consequence would then be that for all the experiences in the realm on the other side of the threshold there can be no certainty as to the truth of their contents from the preface just as an entire plant is contained in seminal form in its seed the whole of anthroposophy can be discovered in rudolf steiner s central work the philosophy of freedom intuitive thinking as a spiritual path a book that lays the foundation for a modern scientific path to the spiritual world given the centrality of the guardian of the threshold to modern initiation one may ask where this theme can be found in the philosophy of freedom sergei prokofieff presents his insights to this little researched question in the first part of this volume in the second part he investigates the connection of the philosophy of freedom to the content of rudolf steiner s research into to what he called the fifth gospel prokofieff s thoughtful commentary sheds new light on the connection between rudolf steiner s early work and what he developed later in life study of the relevant texts reveals that the roots of steiner s early work lie in the same spiritual reality the christ impulse as that of the later anthroposophy he would develop

rudolf arnheim has been known since the publication of his groundbreaking art and visual perception in 1974 as an authority on the psychological interpretation of the visual arts two anniversary volumes celebrate the landmark anniversaries of his works in 2009 in the power of the center arnheim uses a wealth of examples to consider the factors that determine the overall organization of visual form in works of painting sculpture and architecture the dynamics of architectural form explores the unexpected perceptual consequences of architecture with arnheim s customary clarity and precision

for many years rudolf arnheim known as the leading psychologist of art has been keeping notebooks in which to jot down observations ideas questions and even after a stay in japan for a year poems in the haiku pattern some of these notes found their way into his books known and prized the world over such as art and visual perception visual thinking and the power of the center see list below now he has selected from the remaining riches of his notebooks the items in this volume the book will be a joy to ramble through for all lovers of arnheim s work and indeed for anyone who shares arnheim s contagious interest in the order that lies behind art nature and human life it is a seedbed of ideas and observations in his special fields of psychology and the arts i have avoided mere images and i have avoided mere thoughts says arnheim in the introduction but whenever an episode observed or a striking sentence read yielded a piece of insight i had not met before i wrote it down and preserved it there are also glimpses of his personal life his wife his cats his students his neighbors and colleagues he is always concrete in the manner that has become his trademark often witty and sometimes a bit wicked in the blend of life and thought caught in these jottings psychology and the arts are of course prominent but philosophy religion and the natural sciences add to the medley of topics always addressed in a way to sharpen the senses of the reader who sharing arnheim s cue from dylan thomas may accompany him through the parables of sun light and the legends of the green chapels and the twice told fields of childhood all of rudolf arnheim s books have been published by the university of california press

it depends on the human being whether he merely conceives of anthroposophy or whether he experiences it. Rudolf Steiner during the Christmas period of 1923. Rudolf Steiner refounded the anthroposophical society at its headquarters in Dornach, Switzerland. This important event, which has come to be known as the Christmas Conference, can be studied on many levels and its many mysteries have been central to Sergei Prokofiev's anthroposophical research over the years. His beginning point has been an enduring question: what did Rudolf Steiner mean when he called the Christmas Conference the start of a world turning point of time. In this far-reaching work, the author, working from several different viewpoints, guides the reader towards an answer. Prokofiev suggests that the impulse of the Christmas Conference can only be reenlivened today through conscious action by individuals to experience its spiritual essence rather than offering dogmatic conclusions. He opens up paths of approaching this goal by throwing light on different aspects of the conference and what lies at its heart: the foundation stone and its meditation. In particular, Prokofiev explores three key perspectives: the connection of the Christmas Conference with humanity's evolution, the inner relationship of each individual anthroposophist to the Christmas Conference, and the significance of the conference to Rudolf Steiner himself. Although this is a major work of some length, the individual chapters of many human beings hear it are complete in themselves and can therefore be studied independently of each other.

Is there also such a thing as the essence of color? For me, the essence is the spiritual aspect that lives in color, making this spiritual aspect accessible. Is the purpose of this book to keep us familiar with the world of color but can we learn to experience color more intensely? Can we learn to penetrate colors in a more profound way? This book takes the reader into the activity of the colors of the spectrum by investigating them meditatively. The author explains aspects of color phenomenology and prepares the reader for color meditations, including some that he has incorporated into his own personal practices. Kees Veenman, a phenomenologist who specializes in colors, begins by observing the spring gold and the autumn gold of trees before introducing the phenomenological method whereby his research connects with Goethe's theory of color and that of Rudolf Steiner. Using numerous examples and experiments, Veenman guides the reader toward the dynamics and essence of colors, describing his research into the nature of colors along with fresh questions that help us penetrate the world of colors ever more deeply. The author also considers light therapy and the relationship of colors to the seasons as well as to fairytales. The reader is encouraged to meditate with and in colors to discover and experience among other things consciousness of Christ. All of this is presented with clear descriptions, supplemented with color images. Color meditation is for those who want to appreciate the phenomena and wonders of color more deeply and fully understand how color can enrich one's soul and spiritual activity. The correspondence between the emergence and effect of a color outside us and the appearance within us is found in the polarity between light and darkness. Light is a symbol of clear day consciousness, whereas darkness represents the impenetrability of the will. Here we come to the intimate relationship between the world of colors and that of human consciousness with its active and passive side.
